CP Growth Fund Class A

A sub Fund of the CP Investment Funds

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Accumulation): GB00BL6B1D33

ISIN (Income): GB00BL6B1C26

Objectives and Investment Policy

The Fund aims to provide capital growth, net of fees, over 5 year rolling periods.

The Fund aims to achieve the Investment Objective through investment in a diversified international portfolio, in any or all economic sectors which, in normal market conditions, will comprise of at least 80% in equities. The exposure to equities may fall below 80% under difficult market conditions in which the Investment Managers believes that markets are expensive or when higher volatility is anticipated. This could include (but is not limited to) markets resulting from, or anticipating, extreme events (for example, the 2008 global financial crisis). The assets in which the Fund may also invest will be other transferable securities, including alternatives e.g. infrastructure, property and commodities (indirectly via permitted investments such as collective investment schemes), permitted closed-ended investment funds, government and public securities, warrants, money market instruments, deposits and cash or near cash investments. The Fund may obtain this exposure directly or through investment in collective investment vehicles (regulated and unregulated including exchange traded vehicles and investment trusts) which may include other schemes managed by the ACD, any of the Investment Managers or an associate of the ACD or any of the Investment Managers. The use of derivatives and/or hedging transactions is permitted in connection with the Efficient Portfolio Management of the Fund, although its use is expected to be limited. At times, where it is considered appropriate, for example in exceptional market conditions (such as high volatility) or pending investment, the Scheme Property of the Fund will not be fully invested and prudent levels of liquidity will be maintained in order to reduce risk and preserve capital. The Investment Managers will actively manage the Company. This means the Investment Managers actively make decisions about how to invest the Scheme Property (and which investments to buy and sell) instead of simply following a market index.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of simulated data which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.92%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

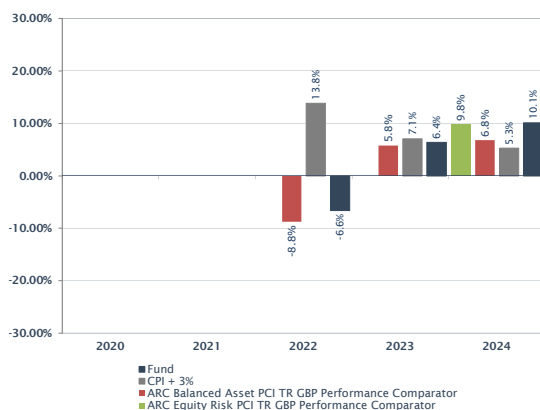

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 31st March 2025. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Charges and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk
