

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Destiny Fund ICVC Sub-Fund A

A sub Fund of the Destiny Fund ICVC

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00B1XMC814 ISIN (Income): GB00B1XMC707

Objectives and Investment Policy

The objective of the sub-fund is to achieve a return (income and capital), net of fees, over a long term period (5 years on a rolling basis). There is no guarantee that the above return will be achieved over that, or any, time period. Investors should note that, notwithstanding the objective, capital is in fact at risk.

The sub-fund's core exposure will be to equities (80-100%), across any geographical sector. At times, the sub-fund may invest up to 20% in emerging markets. These are defined as markets that the Investment Manager views as emerging economies. The above exposure will be gained (50%-100%) through the use of collective investment vehicles (including exchange traded funds). Investment in other collective investment vehicles can include those managed or operated by the ACD or its associate. All other exposure will be attained from direct investments.

At the Investment Manager's discretion, the sub-fund may also invest in other transferable securities including fixed income investments, money market instruments, cash and near cash. The sub-fund will hold cash or near cash to maintain liquidity. There may be times when the Investment Manager considers stock markets to be overpriced or that a period of instability exists which presents unusual risks. In such cases or during such periods, a higher level of liquidity may be maintained and, if considered prudent, the amount of cash or near cash instruments held would be increased.

Derivatives may be used for Efficient Portfolio Management. The sub-fund's use of derivatives for Efficient Portfolio Management is expected to be limited and will usually be limited to foreign exchange only. The sub-fund will be actively managed which means the Investment Manager decides which investments to buy and sell, and when.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of the Fund price which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	7.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.63%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 30th September 2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed 'Payments out of scheme property' of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

(a) The Fund launched in 2007

(b) The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up

Performance source: Morningstar Direct

1. From August 2021, the benchmark is the IA Global peer group. Prior to this the benchmark was a composite benchmark.
