

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

The Diversification Fund ICVC Class B 2002

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Income): GB0031645491

Objectives and Investment Policy

The Company aims to provide a total return (with a combination of income and growth of capital), net of fees, over 5 year rolling periods. There is no guarantee that a return will be achieved over a 5 year period, or any other period and capital is at risk.

To achieve the objective, the Company will have exposure to a geographically diversified portfolio which will typically comprise at least 60% equities, and up to 40% in fixed income assets (which may include government and public securities), other alternative asset classes and cash. The composition of the Scheme Property as between equities and other asset classes, will vary over time within the above parameters, in response to the Investment Advisers' views of the economic and market environment. In addition, the exposure to equities may fall below 60% during difficult markets which means that the Company has discretion to invest in the assets outlined above with no specified geographic focus, target sector or market, or asset allocation. The assets in which the Company may also invest (directly or indirectly) will be other transferable securities, including warrants and money market instruments. Alternative assets (i.e. gold, commodities and property) may also be held but only indirectly via permitted investments such as collective investment vehicles. The above exposure may be gained directly or through the use of collective investment vehicles, including investment trusts, which may include collective investment vehicles managed by the ACD or its associates or the Investment Advisers or their associates. Typically, more than 50% of the above exposure will be gained through the use of collective investment vehicles. The allocation to collective investment vehicles will vary depending on markets and to take advantage of geographical expertise available via funds. All other exposure will be attained from direct investments. Derivatives may be used for Efficient Portfolio Management, although use is expected to be limited. The investment policy of the Company may mean that at times, where it is considered appropriate, the Scheme Property will not be fully invested and that prudent levels of liquidity will be maintained in order to reduce risk and preserve capital. The Company will hold cash and cash equivalents to maintain liquidity. The ACD has appointed multiple Investment Advisers with different investment styles to achieve the Company's investment objective. Allocations to the Investment Advisers are subject to change in order to meet the Company's investment objective and further details regarding the allocations are available upon request from the ACD. The Investment Advisers will actively manage the Company. This means the Investment Advisers will actively make decisions about how to invest the Scheme Property (and which investments to buy and sell) instead of simply following a market index.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares. Investors can buy and sell shares on demand when the scheme prices weekly, each Tuesday, and on the last business day of the month, at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	3.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.11%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 31st July 2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed 'Charges and Expenses' of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

(a) The Fund launched in 2002

(b) The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up

Performance source: Morningstar Direct

1. From September 2023, the benchmark is the ARC US Dollar Steady Growth peer group. Prior to this the benchmark was the ARC Steady Growth Index.
