

Key Investor Information

tutman.

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

KES Diversified Trust A

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB0000016948 ISIN (Income): GB0000016617

Objectives and Investment Policy

The objective of the Scheme is to achieve capital growth over the long term (over a rolling 5 year period), net of fees.

Between 35% to 60% of the Scheme's assets will be invested in UK companies (defined as those which are domiciled, incorporated or have a significant exposure to the UK) which are constituents of the FTSE-All-Share Index. Between 35% and 60% of the Scheme's assets will be invested in overseas equities. Investment trusts and collective investment schemes (including those managed or operated by the Manager or its associates) may be used to achieve some or all of the overseas and smaller companies' exposure. Up to 30% of the Scheme's assets may be invested in bonds, cash, near cash and money market instruments. The weightings in particular asset classes will reflect market conditions. At times, during times of market volatility, the Scheme may hold a significant amount in cash.

The Investment Manager will actively manage the Scheme. This means that the Investment Manager actively makes decisions about how to invest the Scheme property (and which investments to buy and sell) instead of simply following a market index.

The Scheme uses the following combination of benchmarks for performance comparison purposes: 45% FTSE All-Share Index, 45% MSCI World All Ex-UK and 10% BOE Overnight Interest Rate. This combination of indices is not a target benchmark and the Scheme is not constrained by it.

This combination of indices has been selected as a comparator benchmark because the constituents are representative of the areas in which the Scheme itself is likely to invest, and therefore an appropriate comparator for Scheme's performance.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income units, and reinvested in the case of accumulation units. Investors can buy and sell units on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of the Fund price which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	6.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.72%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 31st August 2021. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed 'Charges and Expenses of the Scheme' of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

Performance source: Morningstar Direct

- The Fund launched in 1996
- The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance
- Past performance has been calculated in pounds sterling
- Performance will be calculated as Total Return, including all charges levied against the Fund
- Past performance has limited value as a guide to future performance
- Investments may go down as well as up
