

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

KES Equity Fund A

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB0004438544 ISIN (Income): GB0004438213

Objectives and Investment Policy

The objective of the Scheme is to achieve long term (i.e. over 5 years) capital growth, net of fees.

To achieve this objective, the Scheme will invest (between 65% - 100%) in equities, of which approx. 75% will be invested directly in equities. For certain markets in particular Asia, emerging markets, and Japan, the Scheme will typically use collective investment schemes to gain exposure to equities. In extraordinary circumstances, exposure to equities may be less than 65% for example in a deep recession or if the Investment Manager has concerns regarding equity valuations. The Scheme may also invest in fixed income securities e.g. corporate and government bonds (approx. 0%-35%), cash in sterling or other currencies (in the form of deposits) and near cash (approx. 0%-35%) and money market instruments. Such investment may be made directly or indirectly through the use of collective investment schemes including those managed or operated by the Manager. Investment may be made in any and all economic sectors.

The weightings in each particular asset class may fluctuate in order to reflect market conditions. From time to time and in particular during periods of uncertain or volatile markets, the Investment Manager may choose to hold a substantial proportion (up to 60%) of the property of the Scheme in approved money market instruments and/or cash deposits. The Investment Manager may also hold cash or near cash to the extent this is reasonably necessary to enable pursuit of the Scheme's investment objectives, the redemption of Units and the efficient management of the Scheme. The Investment Manager will actively manage the Scheme. This means that the Investment Manager actively makes decisions about how to invest the Scheme property (and which investments to buy and sell) instead of simply following a market index. Derivatives may be used to seek to reduce risk (relevant to the investment objective) within the Scheme's portfolio, reduce investment costs and generate additional income for the Scheme (often referred to as "efficient portfolio management" or "EPM"). The Scheme's use of derivatives is expected to be limited.

The Scheme uses the Investment Association Flexible Investment peer group for performance comparison purposes.

The peer group has been selected as a comparator for performance because the way in which the Scheme is managed as defined in the Scheme's investment policy is most closely aligned to the description of this Investment Association sector, and it is therefore an appropriate comparator for the Scheme's performance.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income units, and reinvested in the case of accumulation units. Investors can buy and sell units on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of the Fund price which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- Where structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	7.50%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.28%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 31st January 2022. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed 'Charges and Expenses of the Scheme' of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

Performance source: Morningstar Direct

- The Fund launched in 1998
- The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance
- Past performance has been calculated in pounds sterling
- Performance will be calculated as Total Return, including all charges levied against the Fund
- Past performance has limited value as a guide to future performance
- Investments may go down as well as up
