KES Income and Growth Fund A

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB0001465516 ISIN (Income): GB0001465409

Objectives and Investment Policy

The investment objective of the Fund is to provide sustained income, without sacrificing the benefits of long term capital growth.

The Fund will seek to do this by investing in:

- transferable securities;
- units in collective investment schemes; and derivatives.

The Fund will not have any geographical or economic sector emphasis.

The Fund may use derivatives for the purpose of efficient portfolio management (including hedging) and for general investment purposes.

The Scheme uses the Investment Association Flexible Investment peer group for performance comparison purposes.

The peer group has been selected as a comparator for performance because the constituents are representative of the areas in which the Scheme itself is likely to invest, and it is therefore an appropriate comparator for the Scheme's performance.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income units, and reinvested in the case of accumulation units. Investors can buy and sell units on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Credit risk is the risk of loss stemming from a borrower's failure to repay the loan or meet its contractual obligation.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.
