

# Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Knotts Investments Fund

This Fund is managed by Tutman LLP

ISIN (Income): GB00B23X1065

### Objectives and Investment Policy

The objective of the Company is to provide a return through a combination of capital growth and income, net of fees, over a rolling 5 year period.

The Investment Manager adopts a flexible investment strategy and may invest in some or all sectors, including money market, in some or all world markets, (including the UK) in order to best take advantage of economic opportunities worldwide. The Company will typically comprise between 60%-100% in equities, up to 40% in fixed income assets (which may include bonds, government and public securities) and other alternative asset classes (e.g. gold and commodities) and cash. The composition of the Scheme Property as between equities and fixed income and other alternative assets, will vary over time within the above parameters, in response to the Investment Manager's view of the economic and market environment. In addition, the exposure to equities may fall below 60% during difficult markets. The Company may also invest in other transferable securities, including money market instruments and warrants. Investments may be held either directly or indirectly through collective investment vehicles (including those managed by the ACD or its associates or the Investment Manager or its associates). Alternative assets (e.g. gold and commodities) may also be held but only via permitted instruments such as collective investment vehicles, including investment trusts. Derivatives and forward transactions may be used for hedging purposes using efficient portfolio management style techniques. The Company's use of derivatives is expected to be limited. The investment policy of the Company may mean that at times, where it is considered appropriate, the Scheme Property will not be fully invested and that prudent levels of liquidity will be maintained in order to reduce risk and preserve capital. The Company will hold cash and cash equivalents to maintain liquidity. The Investment Manager will actively manage the Company. This means the Investment Manager actively makes decisions about how to invest the Scheme Property (and which investments to buy and sell) instead of simply following a market index.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares. Investors can buy and sell shares on demand when the scheme prices every Monday, except for the last week in a month when you can instead buy and sell shares on the last working day of the month, at 12 midday.

### Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of the Fund price which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry Charge	7.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out

Ongoing charges	1.27%
-----------------	-------

### Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 31st August 2022. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Fees and Expenses" of the Fund's Prospectus, which is available on request via email to [thesisut@tutman.co.uk](mailto:thesisut@tutman.co.uk)

## Past Performance

Performance source: Morningstar Direct

(a) The Fund launched in 2007

(b) The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up

1. From October 2022, the benchmark is IA Mixed Investment 40-85% Shares peer group. Prior to this the benchmark was the IA Flexible Investment peer group.
