## Knotts Investments Fund

This Fund is managed by Tutman LLP

ISIN (Income): GB00B23X1065

### Objectives and Investment Policy

The objective of the Company is to maximize the overall return through investment in some or all sectors, including money market, in some or all world markets, including the UK.

The ACD's investment policy will be to invest in transferable securities, including bonds, collective investment schemes, money market instruments, cash and near cash and deposits that can best take advantage of economic opportunities worldwide. There is no limit to which the Company can be invested in each sector.

It is the ACD's intention that derivatives and forward transactions be used for hedging purposes using efficient portfolio management style techniques.

The ACD does not intend to have an interest in any immovable property or tangible movable property.

The Company will be managed in a manner that maintains eligibility for the stocks and shares component of an individual savings account.

The Company uses the Investment Association Flexible Investment peer group for performance comparison purposes.

The peer group has been selected as a comparator for performance because the constituents are representative of the areas in which the Company itself is likely to invest, and it is therefore an appropriate comparator for the Company's performance.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares. Investors can buy and sell shares on demand when the scheme prices every Monday, except for the last week in a month when you can instead buy and sell shares on the last working day of the month, at 12 midday.

### Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.
