

# Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Lime Grove Fund

This Fund is managed by Thesis Unit Trust Management Limited      ISIN (Accumulation): GB00BJLMS928      ISIN (Income): GB00BJLMS811

### Objectives and Investment Policy

The objective of the Company is to achieve a return (capital growth and income) of the UK Consumer Prices Index plus 3%, net of fees, on average, over rolling 5 year periods. There is no guarantee that any return will be achieved over that, or any time period. Investors should note that capital is in fact at risk.

The primary assets in which the Company will invest will be equities and other transferable securities. The Company may also invest in eligible alternatives (e.g. gold and commodities) via permitted instruments, fixed income investments (e.g. corporate and government bonds), approved money market instruments, deposits, cash and near cash investments and derivatives. Between 50%-100% of the Company's exposure will be gained through the use of collective investment vehicles (regulated and unregulated, including those managed or operated by the ACD, the Investment Adviser or an associate of the ACD or Investment Adviser), exchange traded funds and investment trusts. The allocation to collective investment vehicles will vary within the range of 50%-100% depending on markets and to take advantage of geographical expertise available via funds. All other exposure will be attained from direct investments. At times, during times of market volatility, the Company may choose to hold a significant amount in cash. The Investment Adviser selects assets that in combination will attempt to achieve the Company's return whilst offering a portfolio that is diversified by geography, sector and asset class. The proportion of the Company invested in different asset classes will vary over time in response to the economic and market environment. The Investment Adviser's process entails the selection and blending of high quality and liquid assets from a global universe. These include investments (directly into securities and indirectly via specialist managers) in sectors and strategies to obtain returns from both capital and income. Other than the equity class, the Company invests, whether directly or indirectly via collective investment vehicles, in assets that generate regular cash flows, such as property and loans and bonds issued by governments or corporates. Derivatives may be used for both investment purposes and Efficient Portfolio Management in accordance with the FCA Rules. During times of market volatility, derivatives may be used to reduce risk. The Company will be actively managed. This means that the Investment Adviser decides which investments to buy and sell and when. The performance of the Company will be measured against the UK Consumer Prices Index plus 3% for target return purposes only. This index was chosen as a target for the Company's return because the Company aims to grow investments above the rate of UK inflation.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

### Risk and Reward Profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.66%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The Non-UCITS annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see the section headed 'Charges and Expenses' in the Fund's Prospectus, which is available on request via email to [thesisut@tutman.co.uk](mailto:thesisut@tutman.co.uk)

Past Performance

- (a) The Fund launched in 2021
- (b) The bar chart shows the calendar year returns for the last 3 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance
- (c) Past performance has been calculated in pounds sterling
- (d) Performance will be calculated as Total Return, including all charges levied against the Fund
- (e) Past performance has limited value as a guide to future performance
- (f) Investments may go down as well as up

Performance source: Morningstar Direct
