

Non-UCITS retail scheme Key Investor Information

tutman.

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM Admiral Fund Class A

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Accumulation):

GB00BQMXH6
0

ISIN (Income): GB00BQXMH41

Objectives and Investment Policy

The investment objective of the Company is to provide capital growth, with income being of secondary importance, net of fees, over a rolling 5 year period. The Company will invest in a global portfolio, in any or all economic sectors which, in normal market conditions, will comprise of at least 70% in equities (which will mainly be directly but can also be indirectly via collective investment vehicles). The remainder of the Scheme Property may be invested in fixed income assets (which may include government and public securities) and other transferable securities, warrants, money market instruments, cash, near cash and deposits. The exposure to equities may fall below 70% under difficult market conditions in which the Investment Managers believe that markets are expensive or when higher volatility is anticipated. This could include (but is not limited to) markets resulting from, or anticipating, extreme events (for example, the 2008 global financial crisis). The above exposure may be gained directly or through the use of collective investment vehicles (including exchange traded vehicles, exchange traded commodities and investment trusts) which may include collective investment vehicles managed by the ACD or its associates or the Investment Managers or their associates. The Company may invest in alternatives (e.g. gold and infrastructure) indirectly via permitted instruments such as collective investment vehicles. Derivatives will only be used for Efficient Portfolio Management (including hedging), although use is expected to be limited. The investment policy of the Company may mean that at times, where it is considered appropriate, the Scheme Property of the Company will not be fully invested and that prudent levels of liquidity will be maintained in order to reduce risk and preserve capital. The ACD has appointed multiple Investment Managers with different investment styles to achieve the investment objective. Allocations to the Investment Managers are subject to change in order to meet the Company's investment objective and further details regarding the allocations are available upon request from the ACD. The Investment Managers will actively manage the Company. This means the Investment Managers actively make decisions about how to invest the Scheme Property (and which investments to buy and sell) instead of simply following a market index. The Company uses the ARC Sterling Steady Growth Private Client Index for performance comparison purposes only. This index is not a target and the Company is not constrained by it. The ARC Sterling Steady Growth Private Client Index is a risk-based index that is designed to provide an accurate reflection of the actual returns an investor can expect for a given risk appetite. For the ARC Sterling Steady Growth Private Client Index the relative risk to equity markets is 60-80%. This index has been selected as a comparator because this risk is aligned with the Company's equity exposure as defined in the Company's investment policy. The ACD reserves the right to change the benchmark following consultation with the Depositary and in accordance with the rules of COLL. A change could arise, for example, where the ACD determines that an alternative may be more appropriate. Shareholders will be notified of such a change through an update to the Prospectus and the change noted in subsequent annual and half yearly reports.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 10:30PM.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of simulated data which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.98%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The Non-UCITS annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Charges and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

There is insufficient historical data to provide a useful indication of past performance for the TM Admiral Fund Class A.
