## TM Brunsdon Cautious Growth Fund Class C

A sub Fund of the TM Brunsdon OEIC

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Accumulation):

GB00BTLX2C67

### Objectives and Investment Policy

The aim of the Fund is to provide capital growth, that is, to increase the value of your investment, over a period of at least 7 years.

It will invest at least 70% in other collective investment schemes, investment trusts and exchange traded funds (collectively "Investment Funds"). This could include other Investment Funds managed by the Authorised Corporate Director or the Investment Manager.

Through these Investment Funds, the Fund will have exposure to a range of global asset classes, including:

- o Up to 35% in shares of companies.
- o At least 45% in investment grade and sub-investment grade bonds (which are loans typically issued by companies and governments).
- o The remainder will be in other eligible investments, such as property and cash.

The Fund may also hold up to 30% directly in money market instruments (shorter term loans), cash and structured products.

The Fund may use derivatives (instruments whose returns are linked to another asset, market or other variable factor), or forward transactions to manage currency exposure (hedging) for efficient portfolio management. Other Investment Funds purchased may have the ability to use derivatives to varying degrees.

The Fund will be actively managed, which means the Investment Manager decides which investments to buy and sell and when.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

### Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Credit risk is the risk of loss stemming from a borrower's failure to repay the loan or meet its contractual obligation.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.
