ISIN (Income): GB00BL6KKF54

Derivatives may be used for both investment purposes and Efficient Portfolio Management.

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
 - Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
 - More political, economic or structural challenges face emerging markets or less developed countries than developed countries which may increase volatility and uncertainty.
 - Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
 - Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.
