

# Key Investor Information

tutman.

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## TM Equity Exposure Class D EUR Hedged

A sub Fund of the TM Investment Exposures Fund

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00BM93TV73 ISIN (Income): GB00BM93TW80

### Objectives and Investment Policy

The objective of the Fund is to provide a combination of capital growth and income over the medium to long term (over 5 year rolling periods) which matches the performance of the MSCI ACWI IMI Index, less fees.

The Fund will seek to gain exposure to equities (90% - 100%) by investing in a mixture of index-tracking instruments and exchange traded funds, including but not limited to funds traded on a stock exchange that track an index. The Fund will also hold cash/cash equivalents to maintain liquidity and may also have exposure to cash indirectly via other collective investment schemes (including those managed or operated by the ACD). The Fund will invest in other collective investment schemes that may use derivatives for investment purposes.

Derivatives can be used for efficient portfolio management. The Fund's investment exposure will be diversified by taking a global approach and may be adjusted according to market conditions. The Fund will be actively managed. This means that the Investment Manager actively makes decisions about how to invest the Scheme Property of the Fund (and which investments to buy and sell).

The performance of the Fund will be measured against the MSCI ACWI IMI Index (over 5 year rolling periods), less fees, for target return purposes. The Investment Manager has selected the MSCI ACWI IMI Index as its reference for the Fund, as the Investment Manager believes it is the most appropriately diversified index across a range of criteria including sector, geography and market capitalisation and is a fair representation of the assets in which the Fund will invest, in line with its investment objective and policy.

The information in this document relates to and is representative of the Euro class. The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

### Risk and Reward Profile

The risk rating of the Fund is category 6 due to the volatility of simulated data which sits in a range of between 15% and 25%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.64%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 30th November 2021. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Fees and Expenses" of the Fund's Prospectus, which is available on request via email to [thesisut@tutman.co.uk](mailto:thesisut@tutman.co.uk)

## Past Performance

There is insufficient historical data to provide a useful indication of past performance for the the TM Equity Exposure Class D EUR Hedged.
