

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM Fulcrum Diversified Growth Fund EUR Class A

A sub Fund of the TM Fulcrum NURS Funds

This Fund is managed by Tutman LLP

ISIN (Accumulation):

GB00B17PFC15

Objectives and Investment Policy

The investment objective of the Fund is to achieve long-term capital growth, by targeting an annual net return of inflation (measured against RPI) of +4-5% with lower volatility than equity markets (meaning the MSCI World 100% Hedge to GBP Index) over a rolling five year period. Investors should be aware that the investors' capital is, in fact at risk, and there is no guarantee that these returns will be achieved, whether over rolling five year periods, or any other time period. The Fund will seek to achieve its objective by investing in a well-diversified set of investments. The Fund will target a 4-6% long-term tracking error to global capital markets. The Fund will hold a diversified portfolio, typically consisting of equities, fixed income, commodity related instruments and cash. Investments may be made directly, or in shares and/or units in collective investment schemes (including absolute return funds, index funds such as exchange traded funds (ETFs) and actively managed funds). Indirect exposure to commodities may be sought through investment in transferable securities, eligible index derivatives and collective investment schemes. The Fund may use derivatives for investment purposes and for efficient portfolio management purposes. The Fund will use hedging strategies to reduce risk over the short term without materially altering its risk profile. Investment may be made in other collective investment schemes managed by the ACD, the Investment Manager, or an associate of either. UK Retail Price Index (RPI) has been selected as the performance target because it is a key measure of consumer inflation in the United Kingdom. The Fund aims to deliver positive returns of +4-5% in excess of RPI, over a five year period. RPI is therefore an appropriate performance target for the Fund.

The investment objective and investment policy are subject to the limits in investment under the FCA Rules and as set out in Appendix 2 of the Fund Prospectus. In addition to the restrictions set out in Appendix 2, the Sub-fund will:

1. Not short sell transferable securities, nor engage in securities lending transactions;
2. Not borrow any more than 10% of its Net Asset Value;
3. Invest no more than 15% of the Scheme Property in Fulcrum Alternative Beta+ Daily (a sub-fund of the Fulcrum UCITS SICAV which is managed by the Investment Manager).

UK Retail Price Index (RPI) has been selected as the performance target because it is a key measure of consumer inflation in the United Kingdom. The Fund aims to deliver positive returns of +4-5% in excess of RPI, over a five-year period. RPI is therefore an appropriate performance target for the Fund.

The information in this document relates to and is representative of the Euro class. The base currency of the Fund is pounds sterling.

Income arising from the Fund is reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative or structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- Credit risk is the risk of loss stemming from a borrower's failure to repay the loan or meet its contractual obligation.
- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

| One-off charges taken before or after you invest | |
|---|-------|
| Entry Charge | None |
| Exit Charge | None |
| This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out | |
| Ongoing charges | 1.02% |
| Charges taken from the Fund under certain specific conditions | |
| Performance fee | None |

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The Non-UCITS annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see the section headed 'Charges and Expenses' in the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

(a) The Fund launched in 2006. The TM Fulcrum Diversified Growth Fund EUR Class A launched in 2006

(b) The bar chart shows the calendar year returns for the last 3 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in Euro
