

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM Fulcrum Income Fund Class C Acc GBP

A sub Fund of the TM Fulcrum UCITS Funds

This Fund is managed by Tutman LLP

ISIN (Accumulation): GB00BFOGWT58

Objectives and Investment Policy

The Fund aims to generate an annual income of 4.5% above the Bank of England Base Rate (before tax payable by the Fund) regardless of market conditions. In addition the Fund aims to preserve capital through aiming to control volatility to be less than half the volatility of the equity markets (as measured by the MSCI World Total Return Index hedged to GBP) over rolling three year periods. Investors should be aware that the investors' capital is, in fact at risk, and there is no guarantee that these returns will be achieved, whether over rolling three year periods, or any time period. The Fund seeks to achieve its objective by using a range of investment strategies and techniques to invest actively in a broad selection of asset classes across all economic sectors worldwide. These asset classes may include equities, equity related securities, debt securities (including those issued by corporate bodies, governments and/or supranational institutions), warrants, cash, near cash and money market instruments. Exposure to these asset classes may be gained directly or indirectly through derivatives or collective investment schemes (including but not limited to exchange traded funds) and any other UCITS eligible instrument. The Fund may gain exposure to commodities through swaps on eligible commodity indices and investing in transferable securities in the commodities sector, such as exchange traded commodities.

The Fund's investment strategies and techniques will make significant use of financial derivative instruments. The Fund's use of derivatives may include eligible derivatives on currencies, interest rates, credit, commodity indices and equities, which, may be either exchange traded or off exchange. Such derivative usage can be for the purposes of efficient portfolio management and/or meeting the investment objective of the Fund. Such derivatives have the potential to increase significantly the Fund's risk profile. The use of derivatives will be for purposes of efficient portfolio management and/or meeting the Fund's investment objective. Such derivatives have the potential to increase significantly the Fund's risk profile. The use of derivative instruments as part of the investment policy may mean that the Fund may, from time to time, have substantial holdings in liquid assets including deposits and money market instruments. These can be converted into cash in a short period of time. The target income yield referred to in the investment objective will be measured from 1st April to 31st March each year, and will be measured daily using the prevailing Bank of England base rate and the daily net asset value of the Fund. Income will be distributed monthly.

The Company uses the UK Retail Price Index (RPI) for performance comparison purposes only and the benchmark is not a target benchmark and the Company is not constrained by it. The index has been selected as a benchmark for performance because the constituents are representative of the areas in which the Company itself is likely to invest, and it is therefore an appropriate comparator for the Company's performance.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of simulated data which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- The funds target income is not guaranteed, and the actual income may rise and fall in line with market movements
- Credit risk is the risk of loss stemming from a borrower's failure to repay the loan or meet its contractual obligation.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer.
- Where derivative or structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	3.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.00%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 30th September 2021. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see the section headed 'Charges and Expenses' in the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

Performance source: Morningstar Direct

- The Fund launched in 2018
- The bar chart shows the calendar year returns for the last 3 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance
- Past performance has been calculated in pounds sterling
- Performance will be calculated as Total Return, including all charges levied against the Fund
- Past performance has limited value as a guide to future performance
- Investments may go down as well as up
