TM Gravis UK Listed Property (PAIF Fund) F EUR Hedged

A sub Fund of the TM Gravis Real Assets ICVC
This Fund is managed by Thesis Unit Trust Management Limited
ISIN (Accumulation): GB00BK8VYR93
ISIN (Income): GB00BK8VYP79

Objectives and Investment Policy

It is intended that the Fund will be a PAIF at all times, and, as such, its investment objective is to carry on Property Investment Business and to manage cash raised from investors for investment in the Property Investment Business. In so doing the objective of the Fund is to provide some capital growth through market cycles (7 years) whilst delivering a periodic income. The Fund seeks to achieve its objective primarily (70%+) by investing in a diversified portfolio of transferable real estate securities such as real estate investment trusts ("REITs") listed on the London Stock Exchange, real estate operating companies ("REOCs"), bonds and equities. The Fund seeks to minimise exposure to the retail property sector. In addition to investing in REITs and REOCs the Fund may also invest in other transferable securities (including convertible securities and rated and unrated debt securities of real estate companies), bonds, collective investment schemes, transferable securities, money market instruments, deposits, cash and near cash. Save as noted above, there is no particular emphasis on any geographical area or industry or economic sector. The Fund may hold derivatives only for efficient portfolio management purposes. It is not intended that the use of derivatives for efficient portfolio management purposes will increase the risk profile of the Fund.

The information in this document relates to and is representative of the Euro class. The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares and reinvested in the case of accumulation shares. Investors can redeem shares on demand when the scheme prices daily at 12 midday.

The risk rating of the Fund is category 6 due to the volatility of the Fund price which sits in a range of between 15% and 25%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
