

# Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## TM James Hambro Master Fund

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Income): GB0032564683

### Objectives and Investment Policy

The Fund aims to provide income, that is, money paid out from an investment such as dividends from shares or interest from bonds. The Fund aims to grow the total annual income distribution per share paid out to Shareholders, in line with inflation, measured using the UK Consumer Price Index, each year. The Fund also aims to increase the value of an investment over a minimum of 10 years.

The Fund will invest in a diversified portfolio of assets. Typically, around 70% of the Fund will be invested in shares in companies. However, the Fund is unconstrained and the equity allocation may be significantly lower in volatile market conditions in order to protect the value of the Fund.

The Fund will also invest in bonds, which are loans issued by companies, governments and other institutions. This may include investment grade bonds, where the issuer has a higher capacity to repay the debt, as well as sub-investment grade bonds, which can be more vulnerable to changing market conditions but typically pay a higher rate of interest. Typically, around 10-30% of the Fund will be invested in bonds, however during extreme market conditions this may rise significantly higher, potentially up to 100% of the Fund.

The Fund may also invest in other securities whose returns are linked to the performance of a company, such as preference shares and warrants, money market instruments, which are shorter term loans. The Fund may also hold cash.

The Fund may invest in the above asset classes directly or gain exposure indirectly, through other funds (which could include other funds managed by the Authorised Corporate Director or the Investment Manager), including exchange-traded funds, which typically track an index and investment trusts.

The Fund is actively managed which means the Investment Manager decides the nature and timing of investment decisions in order to meet the overall objective. These decisions will be influenced by the Investment Manager's view of the current economic conditions and other factors such as interest rates.

Where the Fund invests directly in companies, there will be no particular emphasis on any industry or sector. However, there will be no investment in tobacco, alcohol or gambling companies (as defined by any of these activities representing more than 50% of the company's turnover).

The Fund may also use forward transactions and derivatives (which are instruments whose value is linked to the performance of an underlying asset or another variable factor, such as stock markets and currencies). These are used for efficient portfolio management; in order to protect the value of the Fund, to reduce the cost of investing, or to generate additional capital or income without significantly affecting the risk profile of the Fund. Whilst the Fund will not always use these instruments, at times they may be held for extended periods. Other funds held may also use derivatives to varying degrees.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

### Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	10.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.78%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 30th September 2025. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Fees and Expenses" of the Fund's Prospectus, which is available on request via email to [thesisut@tutman.co.uk](mailto:thesisut@tutman.co.uk)

## Past Performance

(a) The Fund launched in 2003

(b) The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up
