

# Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## TM James Hambro Rires Fund

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Income): GB00B2Q1D454

### Objectives and Investment Policy

The aim of the Fund is to grow the value of your investment over a period of at least 5 years, through both capital growth, which is profit on investments, and income, which is money paid out from an investment, such as interest and dividends.

The Fund will invest in a broad range of asset classes and investments across different industries and geographical regions, however not all assets classes may be held at all times. This will include:

- 40% to 85% in shares in companies.
- Up to 35% in bonds and loans issued by governments, supra-national organisations and companies.
- Up to 30% in real assets such as property, infrastructure and commodities (e.g. gold and raw materials).
- Up to 40% in cash.

These asset classes may be held directly (although the Fund will not invest directly in real assets), through other funds (which could include other funds managed by the Authorised Corporate Director or the Investment Manager), exchange traded funds, exchange traded contracts, investment trusts, or structured products, which are securities whose returns are linked to underlying assets or markets.

The Fund may also invest in preference shares, bonds which may be converted into shares (known as convertible bonds) and money market instruments, which are shorter term loans.

The Fund can use derivatives or forward transactions to manage currency exposure and for efficient portfolio management. The Fund will not always hold these, however at times they may be held for extended periods. The use of derivatives is not expected to have a significant impact on the risk profile of the Fund. Any underlying funds held within this Fund may also use derivatives to varying degrees.

The Fund is actively managed, which means the Investment Manager decides which investments to buy and when. Investments selected are based on those the Investment Manager believes will deliver returns consistent with the overall investment objective.

The Investment Manager will decide the proportion of the Fund to be held in each asset class, aiming to achieve a balance which appears most likely to deliver returns consistent with the overall investment objective. This decision, at any given time, will be influenced by the Investment Manager's view of current economic and other circumstances.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

### Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	10.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.25%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 30th September 2024. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Fees and Expenses" of the Fund's Prospectus, which is available on request via email to [thesisut@tutman.co.uk](mailto:thesisut@tutman.co.uk)

## Past Performance

(a) The Fund launched in 2008

(b) The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up

Performance source: Morningstar Direct
