

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM Masonic Charitable Foundation Investment Fund

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00BD0FYK ISIN (Income): GB00BD0MX634

Objectives and Investment Policy

The investment objective of the Fund is to achieve growth in capital and income over the long term (meaning a rolling 5 year period), net of fees, at UK inflation (RPI) plus 4%, through investing in any country and in any economic sector of the world.

Capital is at risk and there is no guarantee that the positive return will be achieved over this specific period, or any other period.

The Fund will comprise an international spread of investments. The Fund predominantly invests in equities and bonds, either directly or indirectly or through regulated or unregulated collective investment schemes. The Fund may also invest in money market instruments, deposits, derivatives, cash and near cash instruments. It is not expected that the Fund will invest more than 10% on average in cash and near cash instruments in normal market conditions, however, there may be a higher weighting in periods where trading or market conditions require it. Derivatives may be used for investment purposes (including indirect exposure to commodities indices) and for efficient portfolio management (including hedging).

The Fund appoints multiple Investment Managers to achieve its objective. Allocations to Investment Managers are subject to change in order to meet the Fund's objective and further details regarding the allocations are available upon request from the Manager.

The Fund's performance is measured against RPI (the "Index") plus 4%. The Index has been selected as a performance target because it is a key measure of consumer inflation in the United Kingdom. The Fund aims to deliver positive returns plus 4% in excess of the Index. The Index is therefore an appropriate target for the Fund.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income units, and reinvested in the case of accumulation units. Investors can buy and sell units on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of simulated data which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge

5.25%

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.70%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The ongoing charge is based on last year's expenses for the year ending 30th September 2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Payments out of scheme property" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

Performance source: Morningstar Direct

(a) The Fund launched in 2018

(b) The bar chart shows the calendar year returns for the last 5 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up
