

# Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## TM New Court Growth Fund Class A

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Accumulation):

GB00BF5Q2678

### Objectives and Investment Policy

The Fund aims to preserve and grow the real (i.e. after inflation) value of the Units of the Fund, net of fees, by the UK Consumer Price Index (CPI) plus 4% per annum, on average, over a five year rolling period. Capital invested in the Fund is at risk and there is no guarantee that the investment objective of the Fund will be achieved over a rolling 5 year period or any other period.

To achieve its objective, the Fund will invest in a global mix of return assets and diversifying assets that are expected to generate capital growth, after inflation. "Return assets" are held to generate capital growth over a five year rolling period and include equities, warrants, corporate bonds, hedge funds and real estate. Hedge funds and real estate will be invested in through collective investment vehicles. Typically the Fund will invest between 65%-80% in assets that fit into this criteria. The balance of the portfolio will be held in "diversifying assets". These assets are expected to provide genuine diversification or protection against challenging equity markets. Diversifying assets include cash deposits, investment grade bonds, money market instruments, derivatives and forward transactions. In addition, the Fund may invest in eligible alternatives (e.g. commodities) indirectly via permitted instruments such as collective investment vehicles. During difficult markets the Fund has discretion to reduce the exposure to return assets to a minimum level of 50%, and the corresponding exposure to diversifying assets will increase. Investment may be made in any and all economic sectors. The weightings in each particular asset class will vary over time within the above parameters, in response to the Investment Manager's view of the economic and market environment. Investments may be held either directly or indirectly through collective investment vehicles (regulated and unregulated, including those managed by the Manager or its associates or the Investment Manager or its associates). Approved derivative transactions will be used for the purpose of efficient portfolio management (including hedging) and meeting the investment objectives of the Fund. Typically, options are used to manage equity risk and forward foreign exchange are used to manage currency risk. The use of derivatives is expected to be limited. Cash and near cash assets will be held to enable the pursuit of the investment objective of the Fund or, as necessary to enable redemption of Units, the efficient management of the Fund in accordance with its investment objective, and other ancillary purposes. The investment policy of the Fund may mean that at times, where it is considered appropriate, the Scheme Property of the Fund will not be fully invested and that prudent levels of liquidity will be maintained. The Fund will be actively managed. This means that the Investment Manager actively makes decisions about how to invest the Scheme Property (and which investments to buy and sell) instead of simply following a market index.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income units, and reinvested in the case of accumulation units. Investors can buy and sell units on demand when the scheme prices daily at 12 midday.

### Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of the Fund price which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative or structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	2.75%
Exit Charge	5.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.33%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 30th June 2025. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed 'Charges and Expenses of the Fund' of the Fund's Prospectus, which is available on request via email to [thesisut@tutman.co.uk](mailto:thesisut@tutman.co.uk)

## Past Performance

(a) The Fund launched in 2012

(b) The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up

Performance source: Morningstar Direct
