

Non-UCITS retail scheme Key Investor Information

tutman.

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM New Court Return Assets Fund Class E

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00BQXL9Q03 ISIN (Income): GB00BQXL9R10

Objectives and Investment Policy

The Fund aims to preserve and grow the real (i.e. after inflation) value of the Units of the Fund, net of fees, by the UK Consumer Price Index (CPI) plus 5% per annum, over a five year rolling period. Capital invested in the Fund is at risk and there is no guarantee that the investment objective of the Fund will be achieved.

To achieve its objective, the Fund will be invested in a global portfolio of assets that are expected to generate capital growth, after inflation (known as "return assets"). Return assets may include equities, corporate bonds, commodities, hedge funds, and real estate (through collective investment vehicles). Typically the Fund will be fully invested in these asset classes, whilst retaining a small level of cash to facilitate redemption requests. In difficult market conditions, the exposure to these asset classes may fall, but the Fund will maintain a minimum exposure of 60% with the balance being maintained in cash and cash like instruments to facilitate a reallocation to the return assets at the appropriate opportunity. The above exposure may be gained directly or through the use of regulated and unregulated collective investment vehicles (including investment trusts and exchange traded vehicles) which may include collective investment vehicles managed by the Manager or their associates or the Investment Manager or their associates. Approved derivative transactions will be used for the purpose of efficient portfolio management (including hedging) and meeting the investment objective of the Fund. Typically, options are used to manage equity risk and forward foreign exchange are used to manage currency risk. The use of derivatives is expected to be limited. Investment may be made in any and all economic sectors. The weightings in each particular asset class will vary over time within the above parameters, in response to the Investment Manager's view of the economic and market environment. The Investment Manager will actively manage the Fund. This means the Investment Manager actively makes decisions about how to invest the Scheme Property (and which investments to buy and sell) instead of simply following a market index.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income units, and reinvested in the case of accumulation units. Investors can buy and sell units on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of simulated data which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	2.75%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.80%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The Non-UCITS annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed 'Charges and Expenses of the Fund' of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk
