

# Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## TM New Institutional World Fund

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Accumulation):

GB00BPCQY311

ISIN (Income):

GB00BZ7P8R57

### Objectives and Investment Policy

The Trust aims to achieve a total return (a combination of capital growth and income) equivalent to the Consumer Price Index + 3% per annum, net of fees over periods of five years. Capital invested is at risk and there is no guarantee that capital growth and income will be achieved or that the investment objective will be met.

To invest directly and indirectly worldwide with no particular emphasis on any industry, market or geographical sector. The Trust may invest in the following asset classes: equities, debt securities (government and corporate bonds, loans, credit), cash, money market instruments, private equity, property, infrastructure, commodities (for example gold) and hedge funds.

Between 40% to 80% of the portfolio will be invested in equities. The Trust may gain exposure to the asset classes listed directly and indirectly by investing in other transferable securities and collective investment schemes (open and closed ended), which may include other collective investment schemes managed or advised by the Manager, the Portfolio Managers or their associates. Exposure to property, private equity, infrastructure and commodities will be indirect.

Whilst a combination of asset classes will always be held, not all asset classes will necessarily be held all the time, with the exception of investing at least 40% in equities. Derivatives such as futures and options, whose value is linked to that of another investment, may also be used for the purpose of managing the Trust in a way that is designed to reduce risk or cost and/or generate extra income or growth (often referred to as 'efficient portfolio management'). The Portfolio Managers may invest in derivatives for investment purposes on 60 days' notice to investors. Where derivatives are used for investment purposes, this may affect the risk profile of the Trust.

The Consumer Price Index plus 3% per annum has been selected as the Trusts target return benchmark as the Trust aims to achieve a return (the money made or lost on an investment) that is 3% above the rate of inflation. The Consumer Price Index is used to measure the rate of inflation. Please refer to the Trust's investment objective for detail regarding how achievement of the target return benchmark is measured, and over what time period.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income units. Investors can buy and sell units on demand when the scheme prices each Thursday at 10.00 am.

### Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- Where derivative or structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	6.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.91%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

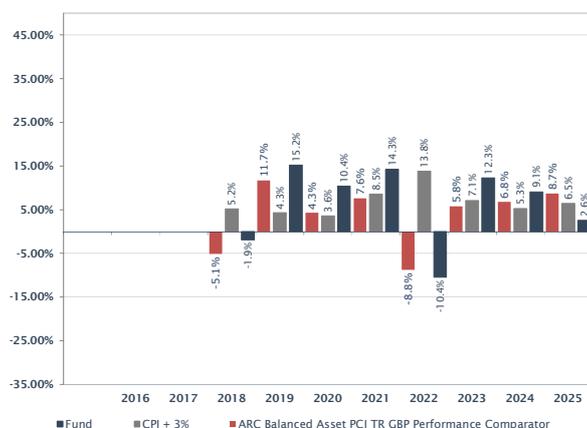

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 31st March 2025. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed 'Fees and Expenses' of the Fund's Prospectus, which is available on request via email to [thesisut@tutman.co.uk](mailto:thesisut@tutman.co.uk)

## Past Performance

(a) The Fund launched in 2017

(b) The bar chart shows the calendar year returns for the last 8 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up

Performance source: Morningstar Direct
