

Key Investor Information

tutman.

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM Oak Fund Sterling B Income

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Income): GB00BNBTKN93

Objectives and Investment Policy

The objective of the Fund is to provide capital growth through exposure to equities and fixed interest securities over the long term (defined as over 5 years).

The Investment Managers seek to invest broadly in any geographical area or economic sector. The investment policy for achieving the objective is to invest in a portfolio of equities and fixed interest securities, either directly through a range of securities or through investment in collective investment schemes (including schemes managed and operated by the ACD or its associates). The normal allocation to equities would be approximately 70% and approximately 30% to fixed interest securities. At times, up to 100% may be invested in collective investment schemes.

From time-to-time in the event of a prolonged period of volatility or uncertainty, the Investment Managers may favour one or several asset classes over others and this may apply for an extended period. This will reflect their perspective of the prevailing market and economic conditions. This may include holding substantial amounts in cash and near cash from time-to-time, in periods when the Investment Managers consider that other asset classes may be over-valued. The Fund may seek to use the full range of investment types as permitted by its investment and borrowing powers including shares, fixed income assets, warrants, units in regulated collective investment schemes, money market instruments, deposits, cash, near cash and derivatives for the purpose of efficient portfolio management or for meeting the objectives of the Fund.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares. Investors can buy and sell shares on demand when the scheme prices weekly, each Friday, the last business day of the month and the 5th April at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of simulated data which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative or structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- More political, economic or structural challenges face emerging markets or less developed countries than developed countries which may increase volatility and uncertainty.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund. All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	6.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.92%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 31st October 2024. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed 'Fees and Expenses' of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk
