

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM Oberon Theseus Fund Class A GBP

A sub Fund of the TM Oberon Funds ICVC
This Fund is managed by Thesis Unit Trust Management Limited
ISIN (Accumulation): GB00BQ7XX821
ISIN (Income): GB00BQ7XX714

Objectives and Investment Policy

The investment objective of the Fund is to provide capital growth, net of fees, over a rolling 5 year period.

To achieve the objective, the Fund will invest in a global portfolio, in any or all economic sectors which, in normal market conditions, will have at least 80% exposure to equities. The remainder of the Scheme Property may be invested in fixed income assets (which may include government and public securities) and other transferable securities, money market instruments, cash, near cash, deposits and derivatives.

The above exposure may be gained directly or indirectly (through the use of derivatives or collective investment vehicles (including exchange traded vehicles and investment trusts)), which may include collective investment vehicles managed by the ACD or its associates or the Investment Manager or its associates.

The exposure to equities may fall below 80% under difficult market conditions in which the Investment Manager believes that markets are expensive or when higher volatility is anticipated. This could include (but is not limited to) markets resulting from, or anticipating, extreme events (for example, the 2008 global financial crisis).

It is the ACD's intention that derivatives will be used in the pursuit of the investment objective of the Fund for both investment purposes and for the purposes of efficient portfolio management. Using derivatives and forward transactions for investment purposes may increase the volatility and the risk profile of the Fund.

The investment policy of the Fund may mean that at times, where it is considered appropriate (for example, during difficult markets conditions), the Scheme Property of the Fund will not be fully invested and that prudent levels of liquidity will be maintained in order to reduce risk and preserve capital.

The Investment Manager will actively manage the Fund. This means the Investment Manager actively makes decisions about how to invest the Scheme Property (and which investments to buy and sell) instead of simply following a market index.

The Fund uses the Investment Association Global peer group for performance comparison purposes.

This peer group is not a target and the Fund is not constrained by it. The peer group has been selected as a comparator for performance because the parameters for this peer group of at least 80% exposure to equities are closely aligned with the policy of the Fund.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 22:30pm.

Risk and Reward Profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.31%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The UCITS annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Charges and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

There is insufficient historical data to provide a useful indication of past performance for the TM Oberon Theseus Fund Class A GBP.
