

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM Oberon UK Core Fund Class A

A sub Fund of the TM Oberon Funds ICVC

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Accumulation): GB00B56N2X45

ISIN (Income): GB0030613276

Objectives and Investment Policy

The investment objective of the Fund is to provide capital growth, with income being of secondary importance, net of fees, over 5 year rolling periods. There is no guarantee that the Fund will achieve the above return over this, or any other, period and investors may not get back the original amount they invested.

The Fund aims to achieve its objective by investing 75% or more of the Scheme Property in UK companies (which are defined as companies incorporated, domiciled or with a significant proportion of their business in the UK), in any or all economic sectors and which are listed on a UK recognised investment exchange (RIE). This allocation may fall below 75% during difficult markets. The Fund may also invest up to 20% in non-UK companies that are not listed on a UK RIE, where the Investment Manager believes that this would be beneficial for the Fund. The investments will be ordinary shares and other transferable securities including, but not limited to, preference shares and debt securities convertible into ordinary stocks and shares. The Fund may also invest in cash, money market instruments, near cash and deposits. The above exposure may be gained directly or indirectly through the use of collective investment vehicles (which may include collective investment vehicles managed by the ACD or its associates, or the Investment Manager or its associates). The Fund will be managed on a concentrated basis, meaning the Fund will typically consist of between 20 and 40 holdings. Investors' attention is drawn to the detailed risk warnings in this Prospectus. The Fund will be managed in a manner that maintains eligibility for ISAs. The Fund's investment portfolio is actively managed. This means that the Investment Manager actively makes decisions about how to invest the scheme property of the Fund instead of simply following a market index.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of the Fund price which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- Shares purchased on the AIM markets (especially those known as 'penny shares') carry a higher degree of risk of losing money than other UK shares.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.91%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The Fund operates with an Ongoing Charges Figure (OCF) cap, which is 0.91%. In the event that the costs which are included in the OCF calculation exceed the amount of the cap then the ACD will arrange for the Investment Manager to pay the excess out of its own resources. If the cap was to be removed, the OCF is estimated to be 1.20%.

The OCF excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units/shares in another collective investment scheme

For more information about charges, please see section headed "Charges and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

Performance source: Morningstar Direct

(a) The Fund launched in 1993

(b) The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up
