

Key Investor Information

tutman.

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM Oberon UK Special Situations Fund Class I GBP

A sub Fund of the TM OEIC

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Accumulation):

GB00BG5Q5X24

ISIN (Income):

GB00BG5Q5V00

Objectives and Investment Policy

The investment objective of the Fund is to achieve long-term (i.e. over 5 years) capital growth, net of fees.

The Fund aims to achieve the investment objective by investing at least 80% of the value of its scheme property in shares listed on UK securities markets in companies that are incorporated or domiciled in the UK. These companies may or may not be headquartered in the UK and may or may not have a significant part of their business activities in the UK. The scheme property of the Fund will be invested in listed companies with any market capitalisation except that no more than 40% of the scheme property of the Fund will be invested in: (i) small companies or (ii) companies listed on the Alternative Investment Market. A small company means a company with a primary listing on the London Stock Exchange whose market capitalisation is lower than that of the largest 350 companies by capitalisation which have their primary listing on the London Stock Exchange. In very broad terms, market capitalisation means the value of a company that is traded on the stock market. The Fund's portfolio will be managed on a concentrated basis (meaning the Fund will hold a limited number of investments).

The Fund may also invest in cash and cash-like instruments (including money market instruments and deposits), warrants and exchange traded derivatives. The use of derivatives is permitted by the Fund for efficient portfolio management purposes (including hedging), and borrowing will be permitted under the terms of the Regulations. On giving 60 days' notice to shareholders, the Fund may, in addition to its other investments powers, use derivatives and forward transaction for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund. The Investment Manager may adjust the Fund's exposure to certain asset classes and investment types in response to adverse market and/or economic conditions, when, in the Investment Manager's opinion, it would be in the best interests of the Fund and its shareholders to do so; this is expected to be for short periods of time.

The Fund's investment portfolio is actively managed. This means that the Investment Manager actively makes decisions about how to invest the scheme property of the Fund instead of simply following a market index. The Investment Manager favours shares which it considers to be undervalued due to the specific situation of the relevant company, its group and/or any member of its group. For example, it may be that the relevant company is subject to recovery action, management change, strong potential growth, is undervalued or is refinancing or it may hold assets which the Investment Manager considers to be undervalued. The Investment Manager is not restricted in its selection of investments for the Fund by any geographic or industry specialisation. Investors should note that while the investment objective of the Fund is to achieve long term (i.e. over 5 years) capital growth there may be situations in which an income return is also achieved. Investors' attention is drawn to the detailed risk warnings in the Prospectus. The Fund will be managed in a manner that maintains eligibility for ISAs.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 6 due to the volatility of the Fund price which sits in a range of between 15% and 25%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- Shares purchased on the AIM markets (especially those known as 'penny shares') carry a higher degree of risk of losing money than other UK shares.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.89%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 30th September 2024. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see clauses 22, 23 and 24 in the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk
