

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM P1 Sustainable World Fund Class A

A sub Fund of the TM P1 Investment Funds

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): **GB00BMFKHT64** ISIN (Income): **GB00BMFKHV86**

Objectives and Investment Policy

The Fund will aim to deliver income and capital growth, net of fees, on a total return basis whilst providing investors with exposure to a diversified portfolio invested in a sustainable and ethically conscious way following the Investment Manager's ethical investment policy.

In addition, the Fund will aim to support enterprises who are actively working to address global warming issues.

Investors should be aware that there is no guarantee that these objectives will be achieved over this specific 5 year period, or any other period and capital is at risk.

The Fund may invest in a broad range of asset classes including fixed interest (approx. 10-40%) e.g. corporate & government bonds (which may include investment and sub-investment grade bonds), debentures etc. and equities (approx. 50-80%). The Fund may also invest in property REITs as well as money market instruments, deposits, warrants, cash and near cash. Exposure to these asset classes will be gained primarily (between 80%-100%) through the use of collective investment schemes although the Fund may also invest directly. The collective investment schemes in which the Fund may invest may include those managed by the ACD an Associate of the ACD or the Investment Manager.

The Fund's non-financial objective is to support companies who are actively working to address global warming issues.

It will do this by focusing on fossil divested investments, renewable energy assets, and through investment in funds that lead companies to achieve net zero emissions. A number of criteria are used to ascertain whether the Fund is meeting this non-financial objective.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of simulated data which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.05%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The UCITS annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Fees and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance
