## TM Redwheel Global Equity Income Fund Class E

A sub Fund of the TM Redwheel Funds

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00BMBQNC30 ISIN (Income): GB00BMBQND47

### Objectives and Investment Policy

The objective of the Fund is to provide a combination of income, net of fees, and long term (over five years) capital growth by investing primarily (over 70%) in a concentrated portfolio of global companies.

The Fund will primarily (over 70%) invest its assets (excluding cash and cash equivalents) in equity and equity linked securities of companies that are listed on a global stock market. The Fund typically holds investments in 30-50 companies. The Fund portfolio is constructed with a wider global view than solely analysing the fundamentals of particular companies based on the Investment Manager's conviction that no company, market or economy can be considered in isolation. This approach concentrates on investing in stocks that, in the opinion of the Investment Manager, offer an attractive value and are issued by companies with good prospects and strong fundamentals. The most attractive stocks for this strategy tend to be those of good quality, cash generative companies with realisable dividend yields. The Fund strategy has an inherent style bias; every holding in a global equity income portfolio has to yield at least 25% more than the broader market (compared to FTSE World Equity Index) at the point of purchase. Any holding whose prospective yield falls below the comparative index yield is sold.

Equity and equity-linked securities include shares, depository receipts, warrants and other participation rights, convertible securities, index and participation notes and equity linked notes. The Fund may also invest, up to 10% of its net assets in collective investment schemes. Collective Investment Schemes may be managed by either the ACD or its associates. Fixed and floating rate debt securities as well as cash and cash equivalents may be held. The Fund may also invest and gain exposure to fixed income instruments, including emerging market and sub-investment grade debt, and convertible securities. GBP is the Fund Currency but assets may be denominated in other currencies. In certain market conditions currency exposure may be hedged. The Fund may invest in financial derivative instruments for hedging and investment purposes. Financial derivative instruments, either exchange traded or OTC, in which the Fund may invest, include, but are not limited to, options, swaps and index futures.

The Fund is actively managed and uses the MSCI World Equity Index NDR index, or equivalent, for performance comparison purpose only. The benchmark can also be used for performance comparison because the constituents are representative of the areas in which the Company itself is likely to invest.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

### Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of simulated data which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- More political, economic or structural challenges face emerging markets or less developed countries than developed countries which may increase volatility and uncertainty.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.19%
Charges taken from the Fund under certain specific conditions
