Sustainability Approach

Sustainability factors are a source of both opportunity and risk and are thus potential contributors to investment performance. The Investment Manager identifies, manages and monitors sustainability opportunities and risk as part of its investment process.

Sustainability is an important consideration in equity and bond issuer analysis but also in macroeconomic analysis. Therefore, issues such as, but not limited to, resource utilisation, energy transition and climate change may be considered when determining the sustainability characteristics of the Fund's assets, and these are monitored at least annually by the Investment Manager.

The Investment Manager identifies and monitors sustainability risk using the following methods:

- Initial stock idea generation and associated due diligence;
- Periodic reviews of individual assets;
- Review of company results, stock performance and external presentations;
- Use of internally developed framework to assess sustainability of sovereign bond holdings based on a series of country level factors and indicators;
- Use of third party specialists and data providers;
- Regular sector and stock market thematic analysis; and
- Active stewardship.

Further details on the above methods is detailed in the Investment Manager's Responsible Investment Policy and can be accessed on the website of the Investment Manager.

The Investment Manager considers a range of metrics to identify, manage and monitor sustainability risk, focusing on those most pertinent to the assessment of risk-adjusted returns. These are outlined in the Investment Manager's TCFD report which can be accessed on the website of the Investment Manager.
