

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM Stonehage Fleming International Fund Class C

A sub Fund of the TM Stonehage Fleming Investments Funds

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Accumulation):

GB00B9651860

Objectives and Investment Policy

The objective of the Fund is to achieve long-term (5 year rolling period) capital growth, net of fees.

The Fund will invest in equities of companies listed on stock exchanges anywhere in the world. Typically, the minimum allocation will be 70%, however, in the event of a market crash/unforeseen event or circumstance this allocation could fall as low as 50%.

There will be no restrictions on the countries, regions or industrial sectors in which invested. Equally there will be no presumption or expectation that the Fund will maintain asset allocation across all countries, regions or industrial sectors on an ongoing basis. The Fund will be free to invest globally, but there may be a bias towards one or more countries, regions or industrial sectors depending on the Investment Manager's views on growth seen in a particular geographical region and will depend on market conditions and worldwide events.

At the Investment Manager's discretion, the Fund may also invest in the following types of assets located anywhere in the world:

- a) other transferable securities (such as government and public securities, other debt instruments and exchange traded funds);
- b) cash and near cash;
- c) deposits;
- d) a maximum of 5% in other regulated collective investment schemes (including those managed or operated by the ACD or its associates); and
- e) money market instruments.

Derivative instruments may be used for efficient portfolio management purposes only. The use of such derivatives is expected to be limited.

The Fund will be actively managed, which means the Investment Manager decides which investments to buy and sell and when.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of the Fund price which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- More political, economic or structural challenges face emerging markets or less developed countries than developed countries which may increase volatility and uncertainty.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.66%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 15th November 2022. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see the section headed 'Charges and Expenses' in the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

(a) The Fund launched in 1994. The TM Stonehage Fleming International Fund Class C launched in 2013

(b) The bar chart shows the calendar year returns for the last 9 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance is calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up

1. The past performance calculated prior to 2017 was achieved under circumstances that no longer apply (based on a previous Investment Policy). The TM Stonehage Fleming International Fund was previously named the TM Cavendish Worldwide Fund. From December 2021, the benchmark is MSCI UK All Cap Net Total Return Index. Prior to this the benchmark was the MSCI All Country World Net Total Return Index.
