

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM Tellworth UK Select Fund - Class A Acc

A sub Fund of the TM Investment Funds

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation):

GB00BNY7YM73

Objectives and Investment Policy

The objective of the Fund is to achieve positive annual returns with lower volatility than the Numis UK All Share Index. The Fund will seek to achieve returns that are in excess of one month SONIA (SONIA1M IR), after fees, over a three year rolling period though there is no guarantee that it will do so. Investors should note that capital is at risk, and, while the Fund aims to achieve positive returns in all market conditions over this period, there is no guarantee that it will do so over a three year rolling period, or any, time period.

The portfolio will consist principally (at least 80%) of exposure to listed UK equity securities (defined as those issued by companies domiciled, incorporated or which have a significant proportion of their business in the UK). These companies will have market capitalisation of over £500m at the time of investment. Such exposure will typically be gained through derivative instruments which may give either long or short exposure to listed equity securities, but may also be gained via direct holdings. The Fund may also invest in other transferable securities, including fixed income (for example corporate and government bonds), money market instruments, cash and near cash. The Fund may invest in other collective investment schemes (including those managed by the ACD, the Investment Manager or an associate of the ACD or Investment Manager), but such investment will be limited to a maximum of 10% of the scheme property of the Fund. Derivatives may be used for both investment purposes and Efficient Portfolio Management (including hedging) in accordance with the FCA Rules. The use of derivative instruments as part of the investment policy may mean that the Fund may, from time to time, have substantial holdings in liquid assets including government securities, deposits and money market instruments. These can be converted into cash in a short period of time. Derivatives may be exchange traded or traded off exchange through market counterparties.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of simulated data which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer.
- Credit risk is the risk of loss stemming from a borrower's failure to repay the loan or meet its contractual obligation.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	3.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.88%
Charges taken from the Fund under certain specific conditions	
Performance fee	15% of the outperformance of the Fund in excess of the hurdle return - One month SONIA

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The UCITS annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.
- Performance Fees. The performance fee paid for the year ending 31st December 2022 was 0.89%

For more information about charges, please see section headed "Charges and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

(a) The Fund launched in 2014

(b) The bar chart shows the calendar year returns for the last 8 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up

Performance source: Morningstar Direct

1. From 29 July 2020, the benchmark is one month SONIA. Prior to this the benchmark was UK RPIX +2%.
