

Non-UCITS retail scheme Key Investor Information

tutman.

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

The Ambrose Fund

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00B3V4VZ37 ISIN (Income): GB00B46B6519

Objectives and Investment Policy

The investment objective of the Company is to achieve long term capital growth (over a rolling 5 year period, net of fees). Capital is at risk. There is no guarantee that this objective will be achieved over five year rolling periods, or any time period.

The Investment Manager will seek to achieve the objective of the Company through exposure in equities (between 90% and 100%) with an international spread, by investing in any country and in any economic sector of the world. At least 70% of exposure will be achieved through indirect investment via regulated collective investment schemes (including those managed by the ACD or its associates) and the remainder by direct investment in equities. It is expected that exposure to UK companies (defined as companies incorporated, domiciled or with a significant proportion of their business in the UK) will normally be via direct investment. At the Investment Manager's discretion, the Company may also invest in other transferable securities including money market instruments, cash and near cash. At times, during times of market volatility, the Company may hold a significant amount in cash. The use of derivatives and/or hedging transactions either directly or indirectly (through collective investment schemes) is permitted in connection with the Efficient Portfolio Management of the Company. It is not intended that the use of derivatives for this purpose will be frequent. The Company will provide investors with an actively managed portfolio which means the investment manager decides which investments to buy and sell, and when.

The Company uses a composite benchmark of 5% FTSE Euro Deposits 3M GBP and 95% MSCI AC World for performance comparison purposes only and the benchmark is not a target benchmark and the Company is not constrained by it.

The indices have been selected as a benchmark for performance because the constituents are representative of the areas in which the Company itself is likely to invest, and it is therefore an appropriate comparator for the Company's performance.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of the Fund price which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.64%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 15th November 2021. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Charges and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

Performance source: Morningstar Direct

(a) The Fund launched in 2011. The The Ambrose Fund launched in 2020

(b) The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance is calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up

1. The past performance in the bar chart is measured by using the Fund's previous composite benchmark as a comparator. In April 2021, the comparator benchmark changed to 5% FTSE Euro Deposits 3M GBP and 95% MSCI ACWI.
