

Non-UCITS retail scheme Key Investor Information

tutman.

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

The Astral Fund

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00BMYHQ84 ISIN (Income): GB00BMYHR653

Objectives and Investment Policy

The Company aims to achieve a capital and income return (net of fees) in excess of inflation, as measured by the Consumer Price Index (CPI), over the long term (over a 5 year period).

Capital is at risk. There is no guarantee that this objective will be achieved over five years, or any time period.

The Company invests in a diversified global portfolio. The Company may invest up to 65% in equity markets and 35% in fixed income assets. Such investment may be made directly or indirectly through the use of collective investment schemes. The Company may also invest, directly or indirectly (through the use of collective investment schemes), in warrants, money market instruments, deposits, cash and near cash. The Company may also achieve indirect exposure to real property through the use of collective investment vehicles.

The use of derivatives and/or hedging transactions either directly or indirectly (i.e. via collective investment schemes) is permitted in connection with the Efficient Portfolio Management of the Company. It is not intended that the use of derivatives for this purpose will be frequent.

The Consumer Price Index (CPI) has been selected as the Company's target return benchmark as the Company aims to achieve a return (the money made or lost on an investment) in excess of the rate of inflation. CPI is used to measure the rate of inflation. Please refer to the investment objective for detail regarding the time period over which this is measured.

In addition, the Company uses the Investment Association Flexible Investment Sector for performance comparison purposes only. This benchmark is not a target benchmark and the Company is not constrained by it. The Investment Association Flexible Investment Sector was chosen as a comparator for performance because the constituents are representative of the areas in which the Company itself is likely to invest, and it is therefore an appropriate comparator for the Company's performance.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of simulated data which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Where structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.67%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 30th November 2021. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Charges and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk
