

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

The Capital Link Growth Fund

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00B55S9W81 ISIN (Income): GB00B94R7F36

Objectives and Investment Policy

The objective of the Company is to achieve capital growth (net of fees) in excess of SONIA +2% over the long term (an 8 year period).

The Company aims to achieve the objective through investment primarily (approx. 70%) in a widely diversified (across asset classes and geographies) portfolio of collective investment schemes. The Company may also invest in transferable securities including shares, government and public securities, certificates representing certain securities, warrants, debentures and alternative debentures, money market instruments, deposits and cash. There may be occasions during times of market stress when the ACD holds a significant (approx. 80%) proportion of the Company in cash and near cash instruments.

Capital is at risk and investors should note that while the Company aims to deliver positive returns in all market conditions, there is no guarantee that this objective will be achieved over 8 years, or any time period.

Derivatives and forward transactions may be used for Efficient Portfolio Management and investment purposes. The use of derivatives may increase the risk profile of the Company.

The Company will be managed in a manner that maintains eligibility for the stocks and shares component of an individual savings account.

The performance of the Company will be measured against the Sterling Overnight Index Average (SONIA) + 2%, net of fees, for target return purposes. This index was chosen because it represents the minimum level of return that is expected from the Company in all market conditions over the 8 year period.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices Thursday of each week, but excluding the Thursday falling in the same week as the last business day of the month, when the Fund will deal on that day at 5pm.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.
- More political, economic or structural challenges face emerging markets or less developed countries than developed countries which may increase volatility and uncertainty.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.42%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The Non-UCITS annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Fees and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

(a) The Fund launched in 2009

(b) The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up

1. The Fund's benchmark for performance comparison purposes is blended SONIA +2%. Prior to 5th August 2020 the benchmark was LIBOR +1%.
