

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

The Iceberg Trust Class B

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Accumulation):

GB00B3VT3F20

Objectives and Investment Policy

The investment objective of the Trust is to achieve capital growth, net of fees, over a rolling 5 year period.

The Investment Managers adopt a flexible investment strategy and may invest in some or all sectors, including money market, in some or all world markets, (including the UK) in order to best take advantage of economic opportunities worldwide. The Trust will typically comprise between 50%-100% in equities, up to 50% in fixed income assets (which may include bonds and government and public securities) and other alternative asset classes (e.g. gold and commodities) and cash. The composition of the Scheme Property as between equities and fixed income and other alternative assets, will vary over time within the above parameters, in response to the Investment Managers' views of the economic and market environment. In addition, the exposure to equities may fall below 50% during difficult markets. The Trust may also invest in other transferable securities, including money market instruments and warrants. Investments may be held either directly or indirectly through the use of regulated and unregulated collective investment vehicles (including those managed by the Manager or its associates or the Investment Managers or their associates). Alternative assets (e.g. gold and commodities) may also be held but only via permitted instruments such as collective investment vehicles, including investment trusts. Derivatives and forward transactions may be used for hedging purposes using efficient portfolio management style techniques. The Trust's use of derivatives is expected to be limited. The investment policy of the Trust may mean that at times, where it is considered appropriate, the Scheme Property will not be fully invested and that prudent levels of liquidity will be maintained in order to reduce risk and preserve capital. The Trust will hold cash and cash equivalents to maintain liquidity. The Investment Managers will actively manage the Trust. This means the Investment Managers actively make decisions about how to invest the Scheme Property (and which investments to buy and sell) instead of simply following a market index.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is reinvested in the case of accumulation units. Investors can buy and sell units on demand when the scheme prices each Thursday, except in the week when the last Business Day of the month falls, when the Dealing Day will be the last Business Day of the month only at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.87%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 28th February 2026. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Fees and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk
