

Non-UCITS retail scheme Key Investor Information

tutman.

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

The Iceberg Trust Class B

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00B3VT3F20

Objectives and Investment Policy

The objective is to maximise the capital return through investment in both the UK and international markets. The Trust will be able to invest in transferable securities, collective investment schemes, money market instruments, cash and deposits that can best take advantage of economic opportunities worldwide.

It is the Manager's intention that derivatives be used for hedging purposes using efficient portfolio management style techniques and may also be used for investment purposes on the giving of 60 days' written notice to unitholders.

The Trust may invest in immovable property on the giving of 60 days' notice to unitholders by the Manager.

The Trust will be managed in a manner that maintains eligibility for the stocks and units component of a personal equity plan or individual savings account.

The Investment Association Flexible Investment peer group has been selected as a comparator for performance because the constituents are representative of the areas in which the Trust itself is likely to invest, and it is therefore an appropriate comparator for the Trust's performance.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is reinvested in the case of accumulation units. Investors can buy and sell units on demand when the scheme prices each Thursday, except in the week when the last Business Day of the month falls, when the Dealing Day will be the last Business Day of the month only at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use approved derivatives for the purpose of hedging only. Hedging is when a position is taken to offset a risk in an opposing currency, market or investment. It is anticipated that the outcome of the use of derivatives would be to reduce, rather than to increase, the risk profile of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.63%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 28th February 2022. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Fees and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk
