

Non-UCITS retail scheme Key Investor Information

tutman.

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

The Juniper Fund

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00B3SVRC60 ISIN (Income): GB00B3SVQX09

Objectives and Investment Policy

The investment objective of the Company is to achieve growth in capital and income by investing in any country and in any economic sector of the world.

Growth in terms of income and capital gains will be sought by constructing a spread of investments. The Company may invest in transferable securities, money market instruments, deposits, units in collective investment schemes (both regulated and unregulated) and derivatives. Derivatives may be used for investment purposes and for Efficient Portfolio Management (including hedging). The Company will pursue a conservative investment strategy by appointing a number of Investment Managers with differentiated investment styles that have historically produced different returns in different market conditions. While the Investment Managers will have access to a broad range of asset classes, the Company may from time to time be fully invested in a particular type of investment. However, in keeping with the conservative investment strategy, it is not anticipated that extensive use will be made of warrants. The Company may, from time to time, hold a significant part of the scheme property in cash or near cash.

The Company appoints multiple Investment Managers to achieve its objective. Allocations to Investment Managers are subject to change in order to meet the Company's objective and further details regarding the allocations are available upon request from the ACD.

Investors may use the Investment Association Flexible Investment peer group for performance comparison purposes. The peer group has been selected as a comparator for performance because it consists of funds similar to the Company. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers) to help investors to compare funds with broadly similar characteristics. It is therefore an appropriate comparator for the Company's performance.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.62%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 31st July 2021. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Payments out of scheme property" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

Performance source: Morningstar Direct

- The Fund launched in 2009
- The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance
- Past performance has been calculated in pounds sterling
- Performance will be calculated as Total Return, including all charges levied against the Fund
- Past performance has limited value as a guide to future performance
- Investments may go down as well as up

Practical Information

The depositary of the Fund is NatWest Trustee and Depositary Services Limited. The depositary has delegated the function of custodian to The Northern Trust Company.
