- (a) receipt by the ACD of the form of renunciation duly signed by all the relevant shareholders and completed as to the appropriate number of shares, together with any other appropriate evidence of title; or
- (b) the valuation point following receipt by the ACD of the request to redeem.

Part of a shareholder's holding may be sold but the ACD reserves the right to refuse a redemption request if the value of the shares to be redeemed is less than any minimum redemption amount set out in Appendix 1 or would result in a shareholder holding less than the minimum holding, as detailed in Appendix 1. In the latter case the shareholder may be asked to redeem their entire shareholding.

14.3 In Specie Redemption

14.3.1 If a shareholder requests the redemption of shares, the ACD may, if it considers the deal substantial in relation to the total size of the Company, arrange for the Company to cancel the shares and transfer Scheme Property to the shareholder instead of paying the price of the shares in cash. A deal involving shares representing 5% or more in value of the Company will normally be considered

substantial, although the ACD may in its discretion agree an in specie redemption with a shareholder whose shares represent less than 5% in value of the Company concerned.

14.3.2 Before the proceeds of cancellation of the shares become payable, the ACD will give written notice to the shareholder that Scheme Property will be transferred to that shareholder.

14.3.3 The ACD will select the property to be transferred (or sold) in consultation with the Depositary and the Investment Manager. They must ensure that the selection is made with a view to achieving no greater advantage or disadvantage to the redeeming shareholder than to continuing shareholders, and any such redemption as set out above, shall be subject to a retention by the Company from that property (or proceeds) the value (or amount) of any stamp duty reserve tax to be paid on the cancellation of shares.

14.4 Direct Issue or Cancellation of shares by an ICVC through the ACD

The ACD may require, on agreement with the Depositary, or may permit, on the request of a shareholder, direct issues and cancellations of shares by the Company.

15. Switching

15.1 If applicable, a holder of shares may at any time switch all or some of his shares of one fund (“Old Shares”) for shares of another fund (“New Shares”). The number of New Shares issued will be determined by reference to the respective prices of New Shares and Original Shares at the Valuation Point applicable at the time the Original Shares are redeemed and the New Shares are issued.

15.2 Switching may be effected in writing to the ACD at 177 Bothwell Street, Glasgow, G2 7ER. The ACD may at its sole discretion and by prior agreement, accept switching instructions by telephone from FCA regulated entities only. The ACD may accept requests to switch Shares by electronic communication. Electronic communication does include email. Telephone calls may be recorded by the ACD, its delegates, their duly appointed agents and any of their respective related, associated or affiliated companies for record keeping, security and/or training purposes, please see paragraph “Telephone Recordings” below for further information.

15.3 The ACD may at its discretion charge a fee on the switching of shares between classes. These fees are set out in Section 17.3.

15.4 If the switch would result in the shareholder holding a number of Old Shares or New Shares of a value which is less than the minimum holding, the ACD may, if it thinks fit, convert the whole of the applicant’s holding of Old Shares to New Shares or refuse to effect any switch of the Old Shares. No switch will be made during any period when the right of shareholders to require the redemption of their shares is suspended (as to which see Section 21 below). The general provisions on selling shares shall apply equally to a switch.

15.5 The ACD may adjust the number of New Shares to be issued to reflect the imposition of any switching fee together with any other charges or levies in

respect of the issue or sale of the New Shares or repurchase or cancellation of the Old Shares as may be permitted pursuant to the FCA Regulations.

15.6 A switch of shares between different funds is treated as a redemption and sale and will, for persons subject to United Kingdom taxation, be a realisation for the purposes of capital gains taxation.

15.7 A shareholder who switches shares in one fund for shares in any other fund will not be given a right by law to withdraw from or cancel the transaction.

16. Share Class Conversions

16.1 If applicable, a holder of shares in a Share Class (“Old Class Shares”) of a fund may exchange all or some of his shares for shares of a different Share Class within the same fund (“New Class Shares”). An exchange of Old Class Shares for New Class Shares will be processed as a conversion (“Share Class Conversion”). Unlike a Switch, a conversion of Old Class Shares into New Class Shares will not involve a redemption and issue of shares. This transaction will not be included in the calculations for the purposes of Income Equalisation the New Class Shares will receive the same treatment as the Old Class Shares.

16.2 The number of New Class Shares issued will be determined by a conversion factor calculated by reference to the respective prices of New Shares and Old Shares at the valuation point applicable at the time the Old Class Shares are converted to New Class Shares.

16.3 Share Class Conversions may be effected in writing to the Transfer Agency Team. The ACD may, at its discretion and by prior agreement, accept conversion instructions by telephone from FCA regulated entities only. A converting shareholder must be eligible to hold the shares into which the Share Class Conversion is to be made. It is the ACD’s intention that Share Class Conversions will be processed at the next Valuation Point following receipt of the instruction, however the ACD reserves the right to defer a Share Class Conversion until no later than after the next Annual Accounting Date if it is in the interests of other Shareholders. The ACD may accept requests to convert Shares by electronic communication. Electronic communication does include email. Telephone calls may be recorded by the ACD, its delegates, their duly appointed agents and any of their respective related, associated or affiliated companies for record keeping, security and/or training purposes, please see paragraph “Telephone Recordings” below for further information.

16.4 If the Share Class Conversion would result in the Shareholder holding a number of Old Class Shares or New Class Shares of a value which is less than the minimum holding in the Share Class concerned, the ACD may, if it thinks fit, convert the whole of the applicant’s holding of Old Class Shares to New Class Shares or refuse to effect any Share Class Conversion of the Old Shares.

16.5 Please note that, under current tax law, a Share Class Conversion of shares between different share classes in the same fund will not be deemed to be a realisation for the purposes of capital gains taxation.

16.6 A shareholder who converts their shares in one share class to shares in a different share class in the same fund will not be given a right by law to withdraw from or cancel the transaction.

17. Dealing Charges

17.1 Preliminary Charge

The ACD may impose a charge on the sale of shares to investors which is based on the amount invested by the prospective investor (though this may be waived wholly or partially at the ACD's discretion). The preliminary charge is payable to the ACD. Full details of the current preliminary charge for each class of share are set out in Appendix 1.

17.2 Redemption Charge

The ACD may make a charge on the redemption of shares (though this may be waived wholly or partially at the ACD's discretion). At present no redemption charge is levied.

The ACD may not introduce a redemption charge on shares unless, not less than 60 days before the introduction, it has given notice in writing to the then current shareholders at their registered address of that introduction and has revised and made available the Prospectus to reflect the introduction and the date of its commencement. If charged, the redemption charge will be deducted from the price of the shares being redeemed and will be paid by the Company to the ACD.

In the event of a change to the rate or method of calculation of a redemption charge, details of the previous rate or method of calculation will be available from the ACD.

17.3 Switching Fee

On the switching of shares of one fund for shares of another fund the Instrument authorises the Company to impose a switching fee. The fee will not exceed an amount equal to the then prevailing preliminary charge for the Class into which shares are being switched. The switching fee is payable to the ACD. Currently no switching charge is levied.

18. Other Dealing Information

Dilution Levy

- 18.1 The basis on which the Company's investments are valued for the purpose of calculating the issue and redemption price of shares as stipulated in the FCA Regulations and the Company's Instrument is summarised in Section 24. The actual cost of purchasing or selling investments may be higher or lower than the mid-market value used in calculating the share price - for example, due to dealing charges, or through dealing at prices other than the mid-market price. Under certain circumstances (for example, large volumes of deals) this may have an adverse effect on the shareholders' interest. In order to prevent this effect, called "dilution", the ACD has the power to charge a "dilution levy" (as it may do as set out below) on the sale and/or redemption of shares but does not at present intend to do so. If a dilution levy is not charged on the sale and/or redemption of shares, the cost of purchasing or selling investments for the Company subsequent to shareholder dealing will be borne by the Company with a consequent effect on future growth. If the ACD charges a dilution levy, it will be calculated by reference to the costs of dealing in the underlying investments of the Company,

including any dealing spreads, commission and transfer taxes. If charged, the dilution levy will be paid into the Company and will become part of its property.

18.2 The need to charge a dilution levy will depend on the volume of sales or redemptions. The ACD may charge a discretionary dilution levy on the sale and redemption of shares if, in its opinion, the existing shareholders (for sales) or remaining shareholders (for redemptions) might otherwise be adversely affected, and if charging a dilution levy is, so far as practicable, fair to all shareholders and potential shareholders. In particular, the dilution levy may be charged in the following circumstances:

- (a) where over a dealing period the Company has experienced a large level of net sales or redemptions relative to its size;
- (b) on "large deals". For these purposes, a large deal means a deal worth 5% or more of the size of the Company; and
- (c) where the ACD considers it necessary to protect the interests of the shareholders of the Company.

It is therefore not possible to predict accurately whether dilution would occur at any point in time. If a dilution levy is required then, based on future projections the estimated rate or amount of such levy will be 0.12% on sales (creation) and 0.06% on redemptions (liquidation) and will be incurred on around 10% of deals. If a dilution levy is not charged then this may restrict the future growth of the Company.

The ACD may alter its dilution policy in accordance with the FCA Regulations either by shareholder consent pursuant to the passing of a resolution to that effect at a properly convened meeting of shareholders and by amending this Prospectus or by giving shareholders notice and amending the Prospectus 60 days before the change to the dilution policy is to take effect.

19. Money Laundering

As a result of legislation in force in the United Kingdom to prevent money laundering, persons conducting investment business are responsible for compliance with money laundering regulations. In order to implement these procedures, in certain circumstances investors may be asked to provide proof of identity when buying shares. The ACD reserves the right to reverse the transaction, to refuse to sell shares or to refuse the release of redemption proceeds if it is not satisfied as to the identity of the applicant.

20. Restrictions and Compulsory Transfer and Redemption

The ACD may from time to time impose such restrictions as it may think necessary for the purpose of ensuring that no shares are acquired or held by any person in breach of the law or governmental regulation (or any interpretation of a law or regulation by a competent authority) of any country or territory. In this connection, the ACD may, inter alia, reject in its discretion any application for the purchase, sale, transfer or switching of shares.

21. Suspension of Dealings in the Company

- 21.1 The ACD may, with the prior agreement of the Depositary, or must if the Depositary so requires, temporarily suspend the issue, cancellation, sale and redemption of shares in the Company, if the ACD or the Depositary is of the opinion that due to exceptional circumstances it is in the interests of all the shareholders. The suspension will only be permitted to continue for as long as it is justified having regard to the interests of the shareholders. On suspension, the ACD (or the Depositary if it has required the ACD to suspend dealings in shares) must immediately notify the FCA giving reasons for the action. The ACD and the Depositary must formally review the suspension at least every 28 days and inform the FCA of the result of this review with a view to ending the suspension as soon as practicable after the exceptional circumstances have ceased.
- 21.2 On suspension, the ACD or Depositary must immediately inform the FCA stating the reasons for its action.
- 21.3 The ACD will notify all shareholders of the suspension in writing as soon as practicable and will publish details to keep shareholders appropriately informed about the suspension, including its likely duration.
- 21.4 Re-calculation of the share price for the purpose of sales and purchases will commence on the next relevant valuation point following the ending of the suspension.

22. Governing Law

All deals in shares are governed by the laws of England and Wales.

23. Valuation of the Company

- 23.1 The price of a share in the Company is calculated by reference to the Net Asset Value of the Company. There is only a single price for any share as determined from time to time by reference to a particular valuation point. The Net Asset Value per share of the Company is currently calculated on each Dealing Day at 5.00 pm.
- 23.2 The ACD may at any time during a Business Day carry out an additional valuation if the ACD considers it desirable to do so.
- 21.3 The ACD maintains a Fair Value Pricing policy with an audit review carried out annually. The policy is detailed fully in the Fair Value Policy document.
- 21.4 The ACD's Transfer Agency Team may request a change to the pricing methodology in certain circumstances. The policy is detailed in the Pricing Policy document.
- 23.5 All asset prices from the primary price source are compared to two other sources to ensure the validity of each price. The policy is detailed in the Pricing Policy document

24. Calculation of the Net Asset Value

- 24.1 The value of the Scheme Property shall be the value of its assets less the value of its liabilities determined in accordance with the following provisions.

24.2 All the Scheme Property (including receivables) is to be included, subject to the following provisions:

24.2.1 Property which is not cash (or other assets dealt with in Section 24.2.2 below) shall be valued as follows and the prices used shall (subject as follows) be the most recent prices which it is practicable to obtain:

- (a) units or shares in a collective investment scheme:
 - (i) if a single price for buying and selling units or shares is quoted, at that price; or
 - (ii) if separate buying and selling prices are quoted, at the average of the two prices providing the buying price has been reduced by any initial charge included therein and the selling price has been increased by any exit or redemption charge attributable thereto; or
 - (iii) if, in the opinion of the ACD, the price obtained is unreliable or no recent traded price is available or if no recent price exists, at a value which, in the opinion of the ACD, is fair and reasonable;
- (b) exchange-traded derivative contracts:
 - (i) if a single price for buying and selling the exchange-traded derivative contract is quoted, at that price; or
 - (ii) if separate buying and selling prices are quoted, at the average of the two prices;
- (c) over the counter derivative contracts shall be valued in accordance with the method of valuation as shall have been agreed between the ACD and the Depositary;
- (d) any other investment:
 - (i) if a single price for buying and selling the security is quoted, at that price; or
 - (ii) if separate buying and selling prices are quoted, at the average of the two prices; or
 - (iii) if, in the opinion of the ACD, the price obtained is unreliable or no recent traded price is available or if the most recent price available does not reflect the ACD's best estimate of the value, at a value which, in the opinion of the ACD, is fair and reasonable; and
- (e) property other than that described in Sections 24.2.1(d) and 24.2.1(e): at a value which, in the opinion of the ACD, is fair and reasonable.

24.2.2 Cash and amounts held in current, deposit and margin accounts and in other time-related deposits shall be valued at their nominal values.

- 24.2.3 In determining the value of the Scheme Property, all instructions given to issue or cancel shares shall be assumed (unless the contrary is shown) to have been carried out (and any cash paid or received) whether or not this is the case.
- 24.2.4 Subject to Sections 24.2.5 and 24.2.6 below, agreements for the unconditional sale or purchase of property which are in existence but uncompleted shall be assumed to have been completed and all consequential action required to have been taken. Such unconditional agreements need not be taken into account if made shortly before the valuation takes place and, in the opinion of the ACD, their omission will not materially affect the final net asset amount.
- 24.2.5 Futures or contracts for differences which are not yet due to be performed and unexpired and unexercised written or purchased options shall not be included under Section 24.2.4.
- 24.2.6 All agreements are to be included under Section 24.2.4 which are, or ought reasonably to have been, known to the person valuing the property assuming that all other persons in the ACD's employment take all reasonable steps to inform it immediately of the making of any agreement.
- 24.2.7 Deduct an estimated amount for anticipated tax liabilities (on unrealised capital gains where the liabilities have accrued and are payable out of the Scheme Property; on realised capital gains in respect of previously completed and current accounting periods; and on income where liabilities have accrued) at that point in time including (as applicable and without limitation) capital gains tax, income tax, corporation tax, value added tax, stamp duty and stamp duty reserve tax.
- 24.2.8 Deduct an estimated amount for any liabilities payable out of the Scheme Property and any tax thereon treating periodic items as accruing from day-to-day.
- 24.2.9 Deduct the principal amount of any outstanding borrowings whenever payable and any accrued but unpaid interest on borrowings.
- 24.2.10 Add an estimated amount for accrued claims for tax of whatever nature which may be recoverable.
- 24.2.11 Add any other credits or amounts due to be paid into the Scheme Property.
- 24.2.12 Add a sum representing any interest or any income accrued due or deemed to have accrued but not received and any stamp duty reserve tax provision anticipated to be received.
- 24.2.13 Currencies or values in currencies other than the base currency or (as the case may be) the designated currency of a Sub-fund shall be converted at the relevant valuation point at a rate of exchange that is not likely to result in any material prejudice to the interests of shareholders or potential shareholders.

25. Price per Share in the Company and each Class

The price per share at which shares are redeemed or sold is the Net Asset Value of a share. In addition, there may, for both purchases and sales, be a dilution levy, as described in Section 18 above and a preliminary or redemption charge as described in Sections 17.1 and 17.2 above.

26. Pricing basis

The Company deals on a forward pricing basis. A forward price is the price calculated at the next valuation point after the sale or redemption is agreed.

27. Publication of Prices

Shareholders can obtain the price of their shares by going to www.trustnet.com or by telephoning 0141 483 9701.

28. Mandatory Redemption of Shares

If the ACD reasonably believes that any shares are owned directly or beneficially in circumstances which:

- (a) constitute a breach of the law or governmental regulation (or any interpretation of a law or regulation by a competent authority) of any country or territory; or
- (b) may (or may if other shares are acquired or held in like circumstances) result in the Company incurring any liability to taxation or suffering any other adverse consequence (including a requirement to register under any securities or investment or similar laws or governmental regulation of any country or territory)

it may give notice to the holder of such shares requiring him or her to transfer them to a person who is qualified or entitled to own them, or to request the redemption of the shares by the Company. If the holder does not either transfer the shares to a qualified person or establish to the ACD's satisfaction that he or she and any person on whose behalf he or she holds the shares are qualified and entitled to hold and own them, he or she will be deemed on the expiry of a 30 day period to have requested their redemption.

29. Risk factors

Potential investors should consider the following risk factors before investing in the Company. Shares in the Company should generally be regarded as a long-term investment.

The main risks associated with the investment activity of the Company are summarised below. Potential investors should consider the following risk factors before investing in the Company.

There is no assurance that the investment objective of the Company will actually be achieved. Past performance is not a reliable indicator of future performance.

29.1 General Risks

The price of shares of the Company and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of a Company will actually be achieved. The following statements are intended to summarise some of the risks, but are not exhaustive, nor do they offer advice on the suitability of investments.

29.2 Equities Risk

Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events. Currency exchange rate movements will also cause changes in value when the currency of the investment is other than sterling.

29.3 Warrants Risk

Where investments are in warrants, the price per share of the Company may fluctuate more than if the Company was invested in the underlying securities because of the greater volatility of the warrant price.

29.4 Bonds and Debt Instruments (including High Yielding Securities) Risk

Where investments are in bonds or other debt instruments, the value of those investments will depend on market interest rates, the credit quality of the issuer and liquidity considerations. Investments in high yielding debt instruments where the level of income may be relatively high (compared to investment grade debt instruments); however, the risk of depreciation and realisation of capital losses on such debt instruments held will be significantly higher than on lower yielding debt instruments.

29.5 Lower Rated/Unrated Securities Risk

The credit quality of debt instruments is often assessed by rating agencies. Medium and lower rated securities and unrated securities of comparable quality may be subject to wider fluctuations in yield, wider bid-offer spreads, greater liquidity premium and accentuated market expectations, and consequently greater fluctuations in market values, than higher rated securities. Changes in such ratings, or expectation of changes, will be likely to cause changes in yield and market values, at times significantly so.

29.6 Collective Investment Schemes Risk

The Company may make investments in collective investment schemes. Such investments may involve risks not present in direct investments, including, for example, the possibility that an investee collective investment scheme may at any time have economic or business interests or goals which are not fully consistent with those of the Company. Moreover, many alternative investment strategies give themselves significant discretion in valuing securities. There may be liquidity constraints and the extent to which an investee fund's securities are valued by independent sources are factors which could impact on the Company's valuation.

Unregulated collective investment schemes (in which the Company may invest up to 20% of its Scheme Property) may invest in highly illiquid securities that may be difficult to value. Moreover, many alternative investment strategies give themselves significant discretion in valuing securities. You should be aware that liquidity constraints and the extent to which a fund's securities are valued by independent sources are factors which could have an impact on the Company's valuation.

29.7 Leveraged Companies Risk

Investments may be made in companies or collective investment schemes which borrow funds. Such companies or collective investment schemes may not be subject to any limitations on the amount of their borrowings, and the amount of borrowings that they may have outstanding at any time may be large in comparison to their capital. Furthermore, given that such collective investment schemes may borrow in order to make investments, the Shareholder must be aware that they may suffer a greater risk resulting from the decline of the Net Asset Value of the underlying investments made with this borrowing facility and therefore, such collective investment schemes' risk exposure will be higher.

29.8 Leverage Risk

Leverage is where a fund borrows money in order to meet redemption requests or, through the use of derivatives, for the purpose of buying or selling assets. Where assets are bought or sold using borrowed money this increases the risk that in the case of losses that these are compounded and as a result have a material negative impact on the value of the Fund.

29.9 New Issue Risk

The Company may invest in initial public offerings, which frequently are smaller companies. Such securities have no trading history and information about these companies may only be available for limited periods. The prices of securities involved in initial public offerings may be subject to greater price volatility than more established securities.

29.10 Futures and Options Risk

The Company may use, under certain conditions, options and futures on indices and interest rates, for the purposes of Efficient Portfolio Management. The use of derivatives for Efficient Portfolio Management is not intended to increase the risk profile of the Company. Also, the Company may hedge market and currency risks using futures, options and forward exchange contracts. Transactions in futures carry a high degree of risk. The amount of the initial margin is small relative to the value of the futures contract so that transactions are "leveraged" or "geared". A relatively small market movement will have a proportionately larger impact which may work for or against the investor. The placing of certain orders which are intended to limit losses to certain amounts may not be effective because market conditions make it impossible to execute such orders. Transactions in options also carry a high degree of risk. Selling (writing) an option generally entails considerably greater risk than purchasing options. Although the premium received by the seller is fixed, the seller may sustain a loss well in excess of that amount. The seller will also be exposed to the risk of the purchaser exercising the option and the seller will be obliged either to settle the option in cash or acquire or deliver the underlying interest. If the option is "covered" by the seller holding a corresponding position in the underlying interest or a future on another option, the risk may be reduced.

29.11 Foreign Currency Risk

The Company may invest in securities denominated in a number of different currencies other than sterling in which the Company is denominated. Changes in

foreign currency exchange rates may adversely affect the value of a company's investments and the income thereon.

29.12 Pricing and Valuation Risk

For quoted investments a valuation price can be obtained from an exchange or similarly verifiable source. However, investment in unquoted and/or illiquid investments which are difficult to value may increase the risk of mispricing. Furthermore, the Company will compute Net Asset Values when some markets are closed for holidays or other reasons. In these and similar cases a verifiable source of market prices will not be available and the ACD may invoke its fair value process which will determine a fair value price for the relevant investments; this fair value process involves assumptions and subjectivity.

29.13 Emerging Countries and Developing Markets Risk

The Company may invest in emerging markets which are undergoing rapid growth and regulatory change. Emerging markets present additional risks to those normally encountered in developed securities markets. These risks may be political, social and economic in nature and may be complicated by inflationary pressures and currency depreciation. The accounting and financial reporting standards, practices and disclosure requirements in some of the countries in which investments may be made may differ from those experienced in more developed markets. Similarly, reliability of the trading and settlement systems in such markets and the liquidity of these markets may not be equal to those available in more developed markets and this could lead to delays in settlement or affect the price at which investments could be realised. Government influence or control of private companies in some countries may be significant and investments may be exposed to the risks of political change, political uncertainty or governmental action. Such assets could be expropriated, nationalised, confiscated or subjected to changes in legislation relating to foreign ownership. The value of investments in emerging markets may therefore be adversely affected by political and/or economic conditions, which would, in turn, adversely impact on the performance of the Company and its share price.

29.14 Smaller and Unquoted Companies Risk

Significant investments may be made in smaller companies, in which there may be no established market for the shares, or the market may be highly illiquid. Because of this potential illiquidity investment in the Company may not be appropriate for all investors, including those who are not in a position to take a long-term view of their investment. The Company may also invest, directly and indirectly, in securities that are not listed or traded on any stock exchange. In such situations, the Company may not be able to immediately sell such securities. The purchase price and subsequent valuation of these securities may reflect a discount, which could be significant, from the market price of comparable securities for which a liquid market exists.

29.15 Investment Trust Risk

The share prices of investment trusts and closed-ended funds typically stand at a discount to their net asset value per share. Such discounts may persist for long periods and/or widen. The Company's share price, being calculated on the basis of the net asset value per share, will reflect the current market value of the

shares of the investment trusts and closed-ended funds in which the Company invests. The shares of certain investment trusts and closed-ended funds in which the Company invests may be valued in a market at a premium to their own net asset value per share. In such cases the share price of such investment trusts and/or closed-ended funds may eventually decline to a discount of their net asset value per share. Investment trusts and closed-ended funds may borrow or otherwise leverage their exposure to their investments. Investments in such companies will tend to have more volatile results than investment in companies without gearing.

29.16 Risk to Capital

This includes potential risk of reduction in capital resulting from withdrawals or cancellations of shares and distributions in excess of investment returns.

29.17 Liquidity Risk

In normal market conditions a Company's assets comprise mainly realisable investments which can be readily sold. A Company's main liability is the redemption of any shares that investors wish to sell. In general the Company manages its investments, including cash, such that it can meet its liabilities. Investments held may need to be sold if insufficient cash is available to finance such redemptions. If the size of the disposals are sufficiently large, or the market is illiquid, then there is a risk that either the investments might not be sold or the price at which they are sold may adversely affect the Net Asset Value of the Company. If there were significant requests for redemption of shares in the Company at a time when a large proportion of the Company's assets was invested in illiquid investments, then the Company's ability to fund those redemptions would be impaired and it might be necessary to suspend dealings in shares in the Company.

29.18 Credit Risk

Investments may be adversely affected if any of the institutions with which money is deposited suffers insolvency or other financial difficulties (default). Credit risk also arises from the uncertainty about an issuer's ultimate repayment of principal and interest for bond or other debt instrument investments. The entire deposit or purchase price of the debt instrument is at risk of loss if there is no recovery after default. The risk of default is usually greatest with bonds and debt instruments that are classed as 'sub-investment' grade.

29.19 Settlement Risk

All security investments are transacted through brokers who have been approved by the Investment Manager as an acceptable counterparty. The list of approved brokers is reviewed regularly. There is a risk of loss if a counterparty fails to perform its financial or other obligations to the Company, for example, the possibility that a counterparty may default, by failing to make payments due, or make payments in a timely manner. If settlement never occurs the loss incurred by the Company will be the difference between the price of the original contract and the price of the replacement contract, or, in the case where the contract is not replaced the absolute value of the contract at the time it is voided. Furthermore, in some markets 'Delivery versus Payment' may not be possible in

which case the absolute value of the contract is at risk if the Company meets its settlement obligations but the counterparty fails before meeting its obligations.

29.20 Custody Risk

Assets of the Company are kept by the custodian and investors are exposed to the risk of the custodian not being able to fully meet its obligation to restate in a short time frame all of the assets of the Company in the case of bankruptcy of the custodian. Securities of the Company will normally be identified in the custodian's books as belonging to the Company and segregated from other assets of the custodian which mitigates but does not exclude the risk of non-restitution in case of bankruptcy. However, no such segregation applies to cash which increases the risk of non-restitution in case of bankruptcy. The custodian does not keep all the assets of the Company itself but uses a network of sub-custodians which are not part of the same group of companies as the custodian. Investors are exposed to the risk of bankruptcy of the sub-custodians in the same manner as they are to the risk of bankruptcy of the custodian.

A Company may invest in markets where custodial and/or settlement systems are not fully developed. The assets of the Company that are traded in such markets and which have been entrusted to such sub-custodians may be exposed to risk in circumstances where the custodian will have no liability.

29.21 Tax Risk

Tax laws, currently in place, may change in the future which could affect the value of the Company's and therefore the Shareholder's investments. Refer to the Section headed 'Taxation' in the Prospectus for further details about the taxation of the Company.

29.22 Inflation Risk

Unless the performance of your investment keeps up with or beats inflation, the real value of your investments will fall over time.

29.23 Political and/or Environmental Risk

The investee companies may operate in countries where the ownership rights may be uncertain and development of the resources themselves may be subject to disruption due to factors including civil disturbances, industrial action, interruption of power supplies, as well as adverse climatic conditions.

29.24 Market Risk

The risk that the entire market of an asset class will decline, thus affecting the prices and the values of the assets.

30. Risk Management

30.1 Upon request to the ACD a shareholder can receive information relating to:

30.1.1 the quantitative limits applying in the risk management of the Company;

30.1.2 the methods used in relation to 30.1.1; and

30.1.3 any recent developments of the risk and yields of the main categories of investment in the Company.

30.2 The FCA Regulations require that authorised corporate directors maintain a liquidity risk management process.

The ACD assesses how many days are likely to be required to sell investments without negatively impacting the fund price or liquidity on a best endeavours basis i.e. a liquidity ladder. The ACD assess the bid/offer spreads and trading volumes as widening spreads and thin trading volumes give an indication that it might be more difficult to dispose of an investment. The characteristic of the Fund determines the frequency of this assessment. The main factors are:

30.2.1 Liquidity of underlying investments;

30.2.2 The size of the investment as a proportion of the Fund and also relative to the market (e.g. proportion of the holding to the average trade size); and

30.2.3 The average holding period of Shareholders in the Fund.

It is also the ACD's responsibility to ensure that the Investment Managers undertake testing of their liquidity management arrangements against various stressed liquidity arrangements on a regular basis.

31. Liabilities of the Company

Shareholders are not liable for the debts of the Company. A shareholder is not liable to make any further payment to the Company after paying the purchase price of shares.

32. Fees and Expenses

General

32.1 The Company may pay out of the property of the Company charges and expenses incurred by the Company, which will include the following expenses:

which may replace the simplified prospectus, including the NURS Key Investor Information Document); and

(s) any payments otherwise due by virtue of the FCA Regulations.

32.2 Value Added Tax is payable on these charges where appropriate.

32.3 Any third party research received in connection with investment advisory services that an Investment Manager provides to the Fund will be paid for by the Investment Manager out of its fees, as relevant in relation to the Fund, and will not be charged to the Fund.

32.4 Expenses are allocated between income and capital in accordance with the FCA Regulations and the OEIC Regulations and as specified in Appendix 1. Where expenses are allocated to income, but at the end of the accounting period there is insufficient income, the shortfall may be allocated to capital in accordance with the FCA Regulations and the OEIC Regulations. This may constrain capital growth.

33. Charges payable to the ACD

33.1 In payment for carrying out its duties and responsibilities the ACD is entitled to take out of the Company an annual management charge.

33.2 The annual management charge is based on the month end valuation from the previous month, accrues daily and is payable monthly in arrears on the last Business Day of each month. The current annual management charges are set out in Appendix 1.

33.3 The ACD is also entitled to reimbursement of all reasonable, properly vouched, out of pocket expenses incurred in the performance of its duties, including stamp duty, stamp duty reserve tax on transactions in shares and expenses incurred in effecting regulatory changes to the Company.

33.4 The ACD may not introduce a new category of remuneration for its services unless the introduction has been approved by an extraordinary resolution of shareholders in the Company.

33.5 The ACD may not increase the current rate or amount of its remuneration payable out of the Scheme Property or the preliminary charge unless, not less than 60 days before the introduction or increase, the ACD gives notice in writing of the introduction or increase and the date of its commencement to all shareholders at their registered address and has revised and made available the Prospectus to reflect the introduction or new rate and the date of its commencement.

33.6 The Thesis Group remuneration policy is designed to be compliant with the AIFMD Remuneration Code contained in SYSC 19B of the FCA Handbook, and provides a framework to attract, retain and reward employees and partners and to maintain a sound risk management framework, with particular attention to conduct risk. The overall policy is designed to promote the long term success of the group. The policy is designed to reward partners, directors and employees for delivery of both financial and non-financial objectives which are set in line with company strategy.

33.7 Details of the Thesis Group remuneration policy are available on the website <https://www.tutman.co.uk/remuneration-policy/>.

A paper copy of the remuneration policy can be obtained free of charge by telephoning 0141 483 9701.

33.8 Any fees payable to the ACD may be reduced or waived by the ACD at its discretion.

34. Investment Manager's fees

The Investment Manager's fees and expenses are paid out of the property of the Company. The Investment Manager's fee accrues daily and is calculated by reference to the value of the Company managed by the Investment Manager on the last Business Day of the preceding month. The fee is payable monthly in arrears on receipt of the invoice from the Investment Manager. The current annual fees are set out in Appendix 1.

35. Depositary's Fee

35.1 The Depositary receives for its own account a periodic fee which will accrue daily from the last Business Day in the preceding month to the last Business Day in each month. It is payable within seven days after the last Business Day in each month. The fee is calculated by reference to the value of the Company on the last Business Day of the preceding month except for the first accrual, which is calculated by reference to the first valuation point of the Company. The fee is payable out of the property attributable to the Company. The current fee is 0.0275% on first £50 million, 0.025% between £50 million and £100 million and 0.02% above £100 million per annum plus VAT; the minimum charge is £7,500 per annum plus VAT.

35.2 These rates can be varied from time to time in accordance with the FCA Regulations.

35.3 The first accrual in relation to the Company will take place in respect of the period beginning on the day on which the first valuation of that Company is made and ending on the last Business Day of the month in which that day falls.

35.4 In addition to the periodic fee referred to above, the Depositary shall also be entitled to be paid transaction and custody charges in relation to transaction handling and safe-keeping of the Scheme Property as follows:

Item	Range
Transaction Charges	Between £1.96 and £75.65 per transaction
Safe Custody Charges	Between 0.001% and 0.5525% of the value of investments being held per annum

35.5 These charges vary from country to country depending on the markets and the type of transaction involved. Transaction charges accrue at the time the transactions are effected and are payable as soon as is reasonably practicable, and in any event not later than the last Business Day of the month when such

charges arose or as otherwise agreed between the Depositary and the ACD. Custody charges accrue and are payable as agreed from time to time by the ACD and the Depositary. In addition, charges may be applied for cash payments, currency conversion, corporate actions and other incidental expenses. Details are available on request.

- 35.6 Where relevant, the Depositary may make a charge for its services in relation to: distributions, the provision of banking services, holding money on deposit, lending money, or engaging in stock lending or derivative transactions, in relation to the Company and may purchase, sell or deal in the purchase or sale of Scheme Property, provided always that the services concerned and any such dealing are in accordance with the provisions of the Regulations.
- 35.7 The Depositary will also be entitled to payment and reimbursement of all costs, liabilities and expenses properly incurred in the performance of, or arranging the performance of, functions conferred on it by the Instrument, the Regulations or by the general law.
- 35.8 On a winding up of the Company or the redemption of a class of shares, the Depositary will be entitled to its pro rata fees, charges and expenses to the date of winding up, the termination, or the redemption (as appropriate) and any additional expenses necessarily realised in settling or receiving any outstanding obligations. No compensation for loss of office is provided for in the agreement with the Depositary.
- 35.9 Any value added tax on any fees, charges or expenses payable to the Depositary will be added to such fees, charges or expenses.
- 35.10 In each such case such expenses and disbursements will also be payable if incurred by any person (including the ACD or any associate or nominee of the Depositary or of the ACD) who has had the relevant duty delegated to it pursuant to the FCA Regulations by the Depositary.

36. Shareholder Meetings and Voting Rights

36.1 Annual General Meeting

The Company will not hold annual general meetings.

36.2 Requisitions of Meetings

36.2.1 The ACD may requisition a general meeting at any time.

36.2.2 Shareholders may also requisition a general meeting of the Company. A requisition by shareholders must state the objects of the meeting, be dated, be signed by shareholders who, at the date of the requisition, are registered as holding not less than one-tenth in value of all shares then in issue and the requisition must be deposited at the head office of the Company. The ACD must convene a general meeting no later than eight weeks after receipt of such requisition.

36.3 Notice of Quorum

Shareholders will receive at least 14 days' notice of a shareholders' meeting and are entitled to be counted in the quorum and vote at such meeting either in person or by proxy. The quorum for a meeting is two shareholders, present in person or by proxy. The quorum for an Adjourned Meeting is also two shareholders present in person or by proxy, however if a quorum is not present from a reasonable time from the time appointed for the meeting then one person entitled to be counted in a quorum shall be a quorum. Notices of Meetings and Adjourned Meetings will be sent to shareholders at their registered addresses.

36.4 Voting Rights

- 36.4.1 At a meeting of shareholders, on a show of hands every shareholder who (being an individual) is present in person or (being a corporation) is present by its representative properly authorised in that regard, has one vote. For joint shareholders, the vote of the first shareholder, or the proxy of the first shareholder, stated in the register of shareholders will be accepted to the exclusion of the votes of other joint shareholders.
- 36.4.2 On a poll vote, a shareholder may vote either in person or by proxy. The voting rights attaching to each share are such proportion of the voting rights attached to all the shares in issue that the price of the share bears to the aggregate price(s) of all the shares in issue at the date seven Business Days before the notice of meeting is deemed to have been served.
- 36.4.3 A shareholder entitled to more than one vote need not, if he votes, use all his votes or cast all the votes he uses in the same way.
- 36.4.4 Except where the FCA Regulations or the Instrument of the Company require an extraordinary resolution (which needs 75% of the votes cast at the meeting to be in favour if the resolution is to be passed) any resolution will be passed by a simple majority of the votes validly cast for and against the resolution.
- 36.4.5 The ACD may not be counted in the quorum for a meeting and neither the ACD nor any associate (as defined in the FCA Rules) of the ACD is entitled to vote at any meeting of the Company except in respect of shares which the ACD or associate holds on behalf of or jointly with a person who, if the registered shareholder, would be entitled to vote and from whom the ACD or associate has received voting instructions. Where every shareholder within the Company is prohibited under COLL 4.4.8R (4) of the FCA Rules from voting, a resolution may, with the prior written agreement of the Depositary, instead be passed with the written consent of shareholders representing 75% of the shares of the Company in issue.
- 36.4.6 Shareholders in this context means shareholders on the date seven Business Days before the notice of the relevant meeting was deemed to have been served but excludes holders who are known to the ACD not to be shareholders at the time of the meeting.

37. Class Meetings

The above provisions, unless the context otherwise requires, apply to Share Class meetings as they apply to general meetings of shareholders. However, an

extraordinary resolution will be required to sanction a variation of class rights where the change is deemed "Fundamental" by the ACD in accordance with COLL 4.3.4 under the FCA Rules.

38. Taxation

The following summary is only intended as a general summary of United Kingdom ("UK") tax law and HM Revenue & Customs practice, as at the date of this Prospectus, applicable to the Fund and to individual and corporate investors who are the absolute beneficial owners of a holding in the fund which is held as an investment. The summary's applicability to, and the tax treatment of, investors will depend upon the particular circumstances of each investor (and it will not apply to persons, such as certain institutional investors, who are subject to a special tax regime). It should not be treated as legal or tax advice. Accordingly, if investors are in any doubt as to their taxation position, they should consult their professional adviser. Levels and bases of, and reliefs from, taxation are subject to change in the future.

The following is divided into sections relating to "Bond Fund" and "Equity Fund". A "Bond Fund" is a fund which invests more than 60% of its market value in "Qualifying Investments" (at all times in each accounting period). The term "Qualifying Investments" includes money placed at interest and securities that are not shares, including but not limited to government and corporate debt securities and cash on deposit. The tax issues relating to the fund and the investors within it are treated separately in this section. It is anticipated that the fund will for most periods be an Equity Fund for these purposes, but that depending on how it is invested it may constitute a Bond Fund for some periods.

Taxation of an Equity Fund

Taxation of Capital Gains

An Equity Fund is not subject to UK taxation on capital gains arising on the disposal of its investments. In the unlikely event that the Fund be considered to be trading in securities under tax law, and to the extent an investment is disposed in a non-distributor/reporting fund, any gains made will be treated as taxable income and not exempt gains.

Tax on income

An Equity Fund will be liable to corporation tax at a rate equal to the lower rate of income tax, currently 20%, on its income after relief for expenses (which include fees payable to the ACD and to the Depositary). Dividends and similar income distributions from UK and non-UK resident companies are generally exempt from corporation tax. Dividends and similar income distributions from UK authorised unit trusts and UK ICVCs are also generally exempt from corporation tax to the extent the underlying income derives from dividends.

Foreign dividends and similar income are generally treated as exempt for the purposes of UK corporation tax. This income may be subject to withholding tax in certain jurisdictions.

Dividend income received from certain countries are likely to be elected to be treated as taxable income in the UK in order to obtain a beneficial rate of

withholding tax in the source country. This is based on guidance provided to the investment fund industry by the Investment Association.

Profits from loan relationships are treated as taxable income, as for a Bond Fund.

Taxation of a Bond Fund

Taxation of Capital Gains

Bonds or loan relationships held are taxable as income (see below) and are not subject to capital gains tax. Capital gains, for example on investment in equities, (except insofar as treated as income gains - see below) accruing to a Bond Fund will be exempt from UK tax on chargeable gains.

Tax on Income

A Bond Fund will be liable to UK corporation tax at 20% on income, translated (where appropriate) into Sterling, from investments in debt, debt-related securities and cash deposits less deductible expenses. Such income will be computed according to the generally accepted accounting practice relevant to the Fund.

The total will be taxed under the Loan Relationship rules. Any income received from UK equities will be exempt from UK corporation tax.

A Bond Fund would generally be entitled to make up distribution accounts in such a way that the income distribution (including accumulations of income, which are deemed to be paid and reinvested as capital) to shareholders is treated as if it were interest for UK tax purposes. If so entitled, the Fund intends that distributions will be made in this way.

- The treatment of distributions as interest distributions for UK tax purposes is significant because:

- distributions made should be deductible for corporation tax purposes against UK taxable income.

The income, less interest distributions, expenses (including the ACD's and Depositary's fees) and any non-UK withholding taxes, is subject to UK corporation tax at a rate equal to the basic rate of income tax (currently 20%). Any corporation tax charge should not be significant.

Capital gains (except insofar as treated as accrued income gains - see above) accruing to a Bond Fund will be exempt from UK tax on chargeable gains.

38.1 Stamp duty reserve tax

On 30 March 2014, Schedule 19 Stamp Duty Reserve Tax (SDRT) ceased to be chargeable on dealings in shares in an OEIC. As such, the provisions relating to SDRT no longer apply. However, investors should note that should SDRT or a similar tax relating to dealings on shares in OEICs be reintroduced in the future, all such costs will be paid out of the fund's Scheme Property and charged to capital.

However it should be noted that in the unlikely event of either of (i) third party transfer of shares or (ii) non-pro rata in specie redemptions, occurring within the fund, SDRT may still be triggered and where applicable be charged to the investor.

38.2 Automatic Exchange of Financial Account Information

38.2.1 US Foreign Account Tax Compliance Act (FATCA)

The US Foreign Account Tax Compliance Act (**FATCA**) is designed to help the Internal Revenue Service (the **IRS**) combat US tax evasion. It requires financial institutions, such as the Fund, to report on US investors or US holdings, whether or not this is relevant. Failure to comply (or be deemed compliant) with these requirements will subject the Fund to US withholding taxes on certain US-sourced income and gains. Under an intergovernmental agreement between the US and the United Kingdom, the Fund may be deemed compliant, and therefore not subject to the withholding tax, if it identifies and reports US taxpayer information directly to HMRC.

Shareholders may be asked to provide additional information to the ACD to enable the Fund to satisfy these obligations. Institutional Shareholders may be required to provide a Global Intermediary Identifications Number (**GIIN**). Failure to provide requested information may subject a Shareholder to liability for any resulting US withholding taxes, US tax information reporting and/or mandatory redemption, transfer or other termination of the Shareholder's interest in its Shares. The Global Intermediary Identification Number for the Fund is available on request.

38.2.2 Common Reporting Standard

The Common Reporting Standard (**CRS**) is the reporting standard approved and developed by the Organisation of Economic Co-operation and Development (OECD) in 2014, and came into force with effect from 1st January 2016. This requires financial institutions such as the Company, to report non-UK resident investors, other than US Persons, to other agreed jurisdictions on an annual basis. The objective of this reporting is the same as the FATCA regulations but on a worldwide basis and is based on **Residency** rather than citizenship as with the US model, and will encompass natural persons and legal entities.

39. Income equalisation

39.1 Income equalisation, as explained below, may apply in relation to the Company, as detailed in Appendix 1.

39.2 Part of the purchase price of a share reflects the relevant share of accrued income received or to be received by the Company. This capital sum is returned to a shareholder with the first allocation of income in respect of a share issued during an accounting period.

39.3 The amount of income equalisation is either (i) the actual amount of income included in the issue price of that share; or (ii) is calculated by dividing the aggregate of the amounts of income included in the price of shares issued or sold to shareholders in an annual or interim accounting period by the number of those shares and applying the resultant average to each of the shares in question.

39.4 The ACD currently uses the method outlined in (ii) in Section 39.3 to apply income equalisation.

40. Winding up of the Company

40.1 The Company shall not be wound up except as an unregistered company under Part V of the Insolvency Act 1986 or under the FCA Regulations.

40.2 Where the Company is to be wound up under the FCA Regulations, such winding up may only be commenced following approval by the FCA. The FCA may only give such approval if the ACD provides a statement (following an investigation into the affairs of the Company) either that the Company will be able to meet its liabilities within 12 months of the date of the statement or that the Company will be unable to do so. The Company may not be wound up under the FCA Regulations if there is a vacancy in the position of ACD at the relevant time.

40.3 The Company may be wound up under the FCA Regulations if:

40.3.1 an extraordinary resolution to that effect is passed by shareholders; or

40.3.2 the period (if any) fixed for the duration of the Company by the Instrument expires, or an event (if any) occurs on the occurrence of which the Instrument provides that the Company is to be wound up (for example, if the share capital of the Company is below its prescribed minimum); or

40.3.3 on the date of effect stated in any agreement by the FCA to a request by the ACD for the revocation of the authorisation order in respect of the Company.

40.4 On the occurrence of any of the above:

40.4.1 the parts of the FCA Regulations and the Instrument relating to pricing and dealing and investment and borrowing will cease to apply to the Company;

40.4.2 the Company will cease to issue and cancel shares in the Company and the ACD shall cease to sell or redeem shares or arrange for the Company to issue or cancel them for the Company (except in respect of final cancellation);

40.4.3 no transfer of a share shall be registered and no other change to the register shall be made without the sanction of the ACD;

40.4.4 where the Company is being wound up, the Company shall cease to carry on its business except in so far as it is beneficial for the winding up of the Company;

40.4.5 the corporate status and powers of the Company and, subject to the provisions of Sections 40.4.1 to 40.4.4 above, the powers of the ACD shall remain until the Company is dissolved.

- 40.5 The ACD shall, as soon as practicable after the Company falls to be wound up, arrange for all shares in issue to be cancelled, realise the assets and meet the liabilities of the Company and, after paying out or retaining adequate provision for all liabilities properly payable and retaining provision for the costs of winding up, arrange for the Depositary to make one or more interim distributions out of the proceeds remaining (if any) to shareholders proportionately to their rights to participate in the Scheme Property. When the ACD has caused all of the Scheme Property to be realised and all of the liabilities of the Company to be realised, the ACD shall arrange for the Depositary to also make a final distribution to shareholders (if any Scheme Property remains to be distributed) on or prior to the date on which the final account is sent to shareholders of any balance remaining in proportion to their holdings in the Company.
- 40.6 As soon as reasonably practicable after completion of the winding up of the Company the ACD or the Company shall notify the FCA.
- 40.7 On completion of a winding up of the Company, the Company will be dissolved and any money (including unclaimed distributions) standing to the account of the Company, will be paid into court within one month of dissolution.
- 40.8 Following the completion of the winding up of the Company, the ACD shall notify the Registrar of Companies and shall notify the FCA that it has done so.
- 40.9 Following the completion of the winding up of the Company, the ACD must prepare a final account showing how the winding up took place and how the Scheme Property was distributed. The auditors of the Company shall make a report in respect of the final account stating their opinion as to whether the final account has been properly prepared. This final account and the auditors' report must be sent to the FCA, to each shareholder and, in the case of the winding up of the Company, to the Registrar of Companies within four months of the termination of the winding up.

41. General Information

41.1 Accounting Periods

The annual accounting period of the Company ends each year on 30 November (the accounting reference date). The interim accounting period of the Company ends each year on 31 May.

41.2 Income Allocations

- 41.2.1 Allocations of income are made on both an interim basis and an annual basis in respect of the income available for allocation in each accounting period.
- 41.2.2 Distributions of income in respect of Income Shares are paid by BACS, in accordance with Section 41.2.3, on or before the annual income allocation date of 31 March and the interim income allocation date of 30 September.
- 41.2.3 The amount available for distribution in any accounting period is calculated by taking the aggregate of the income received or receivable for the account of the Company in respect of that period, and deducting the charges and expenses paid or payable out of income in respect of that accounting period. The ACD then makes such other adjustments as it considers appropriate (and after consulting

the Depositary as appropriate) in relation to taxation, income equalisation, income unlikely to be received within 12 months following the relevant income allocation date, transfers between the income and capital account and any other adjustments which the ACD considers appropriate after consulting the auditors.

- 41.2.4 The Authorised Corporate Director and the Depositary have agreed a de minimis amount of £20 in respect of distribution of income payments made by cheque.
- 41.2.5 If a distribution remains unclaimed for a period of six years after it has become due, it will be forfeited and will revert to the Company.
- 41.2.6 Income will be distributed as a dividend payment where the Company is deemed to be an Equity Fund or as an interest payment where the Company is deemed to be a Bond Fund over the relevant accounting period (please see paragraph 38 (Taxation) for further details). The treatment of income anticipated by the ACD is given in Appendix 1, although shareholders are advised the treatment of income will depend on the composition of assets over the accounting period. Income can only be distributed as an interest payment if the Company has held the minimum Qualifying Investments over the accounting period. Details of the treatment of income for taxation purposes over an accounting period will be given in a tax voucher sent to all shareholders when the income is allocated.

41.3 Annual and half-yearly reports

- 41.3.1 An Annual report of the Company will be published within four months of each annual accounting period and a half-yearly report will be published within two months of each interim accounting period. The annual and half-yearly reports are available upon request.
- 41.3.2 The annual and half-yearly reports will include disclosures on the following:
 - (a) The percentage of the Company's assets that are subject to special arrangements arising from their illiquid nature;
 - (b) Any new arrangements for managing the liquidity of the Company;
 - (c) The current risk profile of the Company and the risk management systems employed by the ACD to manage those risks;
 - (d) Any changes to the maximum level of leverage that the ACD may employ on behalf of the Company;

If you ask the ACD to send you a recording of a particular call, the ACD may ask for further information to help identify the exact call to which your request relates.

41.7 Best Execution

41.7.1 The ACD must act in the best interests of the Fund when executing decisions to deal on behalf of the Fund. The ACD's order execution policy sets out the (i) systems and controls that have been put in place and (ii) the factors which the ACD expects the Investment Manager to consider when effecting transactions and placing orders in relation to the Fund. This policy has been developed in accordance with the ACD's obligations under the Regulations to obtain the best possible result for the Company.

41.7.2 Details of the order execution policy are available from the ACD on request. If you have any questions regarding the policy please contact the ACD or your professional adviser.

41.8 Inducements and Soft Commission

41.8.1 When executing orders, or placing orders with other entities for execution, that relate to financial instruments for, or on behalf of, the Fund, an Investment Manager or the ACD (as relevant) will not accept and retain any fees, commissions or monetary benefits; or accept any non-monetary benefits, where these are paid or provided by any third party or a person acting on behalf of a third party.

41.8.2 The Investment Manager or ACD will return to the Fund as soon as reasonably possible after receipt any fees, commissions or any monetary benefits paid or provided by any third party or a person acting on behalf of a third party in relation to the services provided to the Fund, and disclose in the annual report the fees, commissions or any monetary benefits transferred to them.

41.8.3 However, the Investment Manager or ACD may accept without disclosure minor non-monetary benefits that are capable of enhancing the quality of service provided to the Fund; and of a scale and nature such that they could not be judged to impair their compliance with its duty to act honestly, fairly and professionally in the best interests of the Fund.

Investment of the assets of the Company must comply with the FCA Regulations and its own investment objective and policy. A detailed statement of the investment and borrowing restrictions applicable to the Company is contained in Appendix 2. Lists of the eligible securities and derivatives markets on which the Company may invest are contained in Appendix 4 and Appendix 5. A list of the locations of the establishment of any second schemes which the Company may invest in from time to time is shown in Appendix 10.

Changes to the Investment Objective and Policy will normally require approval by shareholders at an EGM if the change alters the nature or risk profile of the scheme, or on giving 60 days notice to shareholders where these do not alter the nature or risk profile of the scheme. In exceptional circumstances, changes may be made to the Investment Objective and Policy with no minimum period of notice where these are for clarification purposes only. In all cases, changes may only be made to the Investment Objective and Policy following notification to the FCA pursuant to the OEIC regulations and confirmation from the FCA that these changes will not affect the ongoing authorisation of the Company.

The OCF provides investors with a clearer picture of the total annual costs in running a collective investment scheme and is based on the previous year's expenses. The figure may vary from year to year and it excludes the costs of buying or selling assets for the Company (but includes transaction charges incurred by investing in any other collective investment schemes). Where there is not enough historic data available, or when historic data will not provide a reliable indication of future costs, an estimated OCF will be calculated based on the most reliable information available (OCF (Estimated)). The OCF is displayed in the Key Investor Information Document (KIID). A copy of the KIID can be provided free of charge on request.

Appendix 2

Investment and borrowing powers of the Company

1. Investment and borrowing powers of the Company

These restrictions apply to the Company.

Investment restrictions

The Company will be invested with the aim of achieving the investment objective of the Company but subject to the limits on investment set out in the FCA Regulations and the Company's investment policy.

Generally the Company will invest in the investments to which it is dedicated including approved securities which are transferable securities admitted to or dealt on a regulated market or in a market in an UK or an EEA State which is regulated, operates regularly and is open to the public, units in collective investment schemes, warrants, derivatives and forward transactions, money market instruments and deposits. Derivatives and forward transactions will only be used by the Company for Efficient Portfolio Management purposes and the Company may only use derivatives and forward transactions for investment purposes on the giving of 60 days' notice to shareholders.

The investment objective and policy of the Company are subject to the limits on investment under chapter 5 of the FCA Regulations applicable to non-UCITS Retail Schemes, which are summarised below. The ACD must ensure that, taking account of the investment objective and the investment policy of the Company, the Company's investments provide a prudent spread of risk.

2. Transferable securities and money market instruments

2.1 Types of transferable security

- (a) A transferable security is an investment which is a share, a debenture, an alternative debenture, a government and public security, a warrant, or a certificate representing certain securities (as such terms are defined in the FCA Regulations).
- (b) An investment is not a transferable security if the title to it cannot be transferred, or can be transferred only with the consent of a third party.
- (c) In applying paragraph 2.1(b) to an investment which is issued by a body corporate, and which is a share or a debenture (as such terms are defined in the FCA Handbook), the need for any consent on the part of the body corporate or any members or debenture holders of it may be ignored.
- (d) An investment is not a transferable security unless the liability of the holder of it to contribute to the debts of the issuer is limited to any amount for the time being unpaid by the holder of it in respect of the investment.

2.2 Criteria for investment in transferable securities

- (a) The Company may invest in a transferable security only to the extent that the transferable security fulfils the following criteria:
 - (i) the potential loss which the Company may incur with respect to holding the transferable security is limited to the amount paid for it;
 - (ii) its liquidity does not compromise the ACD's ability to comply with its obligations to redeem shares at the request of any qualifying shareholder;
 - (iii) reliable valuation is available for it as follows:
 - (aa) in the case of a transferable security admitted to or dealt in on an eligible market (see further paragraph 2.11 below for an explanation of eligible market) where there are accurate, reliable and regular prices which are either market prices or prices made available by valuation systems independent from issuers;
 - (bb) in the case of a transferable security not admitted to or dealt in on an eligible market, where there is a valuation on a periodic basis which is derived from information from the issuer of the transferable security or from competent investment research;
 - (iv) appropriate information is available for it as follows:
 - (aa) in the case of a transferable security admitted to or dealt in on an eligible market, where there is regular, accurate and comprehensive information available to the market on the transferable security or, where relevant, on the portfolio of the transferable security;
 - (bb) in the case of a transferable security not admitted to or dealt in on an eligible market where there is regular and accurate information available to the ACD on the transferable security or, where relevant, on the portfolio of the transferable security;
 - (v) it is negotiable; and
 - (vi) its risks are adequately captured by the risk management process of the ACD.
- (b) Unless there is information available to the ACD that would lead to a different determination, a transferable security which is admitted to or dealt in on an eligible market shall be presumed:

- (i) not to compromise the ability of the ACD to comply with its obligations to redeem shares at the request of any qualifying shareholder; and
- (ii) to be negotiable.

2.3 Closed-ended funds constituting transferable securities

A unit in a closed-ended fund shall be taken to be a transferable security for the purposes of investment by the Company, provided it fulfils the criteria for transferable securities set out in paragraph 2.2 above and either:

- (a) where the closed-ended fund is constituted as an investment company or a unit trust:
 - (i) it is subject to corporate governance mechanisms applied to companies; and
 - (ii) where another person carries out asset management activity on its behalf that person is subject to national regulation for the purpose of investor protection; or
- (b) where the closed-ended fund is constituted under the law of contract:
 - (i) it is subject to corporate governance mechanisms equivalent to those applied to companies; and
 - (ii) it is managed by a person who is subject to national regulation for the purpose of investor protection.

2.4 Transferable securities linked to other assets

- (a) The Company may invest in any other investment which shall be taken to be a transferable security for the purposes of investment by the Company provided the investment:
 - (i) fulfils the criteria for transferable securities set out in paragraph 2.2 above; and
 - (ii) is backed by or linked to the performance of other assets which may differ from those in which the Company can invest.
- (b) Where an investment in paragraph 2.4(a) contains an embedded derivative component, the requirements of this Appendix and the FCA Regulations with respect to derivatives and forwards will apply to that component.

2.5 Approved money market instruments

An approved money market instrument is a money market instrument which is normally dealt in on the money market, is liquid and has a value which can be accurately determined at any time.

- 2.6 A money market instrument shall be regarded as normally dealt in on the money market if it:
 - 2.6.1 has a maturity at issuance of up to and including 397 days;
 - 2.6.2 has a residual maturity of up to and including 397 days;
 - 2.6.3 undergoes regular yield adjustments in line with money market conditions at least every 397 days; or
 - 2.6.4 has a risk profile, including credit and interest rate risks, corresponding to that of an instrument which has a maturity as set out in 2.6.1 or 2.6.2 or is subject to yield adjustments as set out in 2.6.3.
- 2.7 A money market instrument shall be regarded as liquid if it can be sold at limited cost in an adequately short time frame, taking into account the obligation of the ACD to redeem shares at the request of any qualifying shareholder.
- 2.8 A money market instrument shall be regarded as having a value which can be accurately determined at any time if accurate and reliable valuation systems, which fulfil the following criteria, are available:
 - 2.8.1 enabling the ACD to calculate a net asset value in accordance with the value at which the instrument held in the portfolio could be exchanged between knowledgeable willing parties in an arm's length transaction; and
 - 2.8.2 based either on market data or on valuation models including systems based on amortised costs.
- 2.9 A money market instrument that is normally dealt in on the money market and is admitted to or dealt in on an eligible market shall be presumed to be liquid and have a value which can be accurately determined at any time unless there is information available to the ACD that would lead to a different determination.
- 2.10 Transferable securities and money market instruments generally to be admitted to or dealt in on an eligible market
 - (a) Transferable securities and money market instruments held within the Company must be:
 - (i) admitted to or dealt in on an eligible market (as described in paragraph 2.11); or
 - (ii) recently issued transferable securities, provided that the terms of issue include an undertaking that application will be made to be admitted to an eligible market; and such admission is secured within a year of issue;
 - (iii) an approved money market instrument not admitted to or dealt in on an eligible market, within paragraph 2.12 or 2.13 subject to paragraph 2.14.
 - (b) The Company may invest up to 20% of the Company's investments in transferable securities not within paragraph 2.10(a) or money market

instruments other than those referred to in paragraph 2.10(a) which are liquid and have a value which can be determined accurately at any time.

2.11 Eligible markets regime

- (a) To protect investors the markets in which investments of the Company are dealt in or traded on should be of an adequate quality (**eligible**) at the time of acquisition of the investment and until it is sold. Where a market ceases to be eligible, investments on that market cease to be approved securities. The 20% restriction in paragraph 2.10(b) above on investment in non-approved securities applies and exceeding this limit because a market ceases to be eligible will generally be regarded as an inadvertent breach.
- (b) A market is eligible for the purposes of the FCA Handbook if it is:
 - (i) a regulated market (as defined in the FCA Handbook); or
 - (ii) a market in the UK or in an EEA state which is regulated, operates regularly and is open to the public.
- (c) A market not falling within paragraph 2.11(b) is eligible for the purposes of the FCA Handbook if:
 - (i) the ACD after consultation with and notification to the Depositary decides that market is appropriate for investment of, or dealing in the Company's property;
 - (ii) the market is included in a list in the Prospectus; and
 - (iii) the Depositary has taken reasonable care to determine that adequate custody arrangements can be provided for the investment dealt in on that market; and all reasonable steps have been taken by the ACD in deciding whether that market is eligible.
- (d) In paragraph 2.11(c)(i) a market must not be considered appropriate unless it is regulated, operates regularly, is recognised as a market or exchange or as a self-regulating organisation by an overseas regulator, is open to the public, is adequately liquid, and has adequate arrangements for unimpeded transmission of income and capital to or to the order of investors.
- (e) The eligible securities and derivatives markets for the Company are set out in Appendix 4 and Appendix 5. New eligible securities markets may be added to the existing list in accordance with the FCA Regulations governing approvals and notifications.

2.12 Money market instruments with a regulated issuer

 - (ii) the instrument is issued or guaranteed in accordance with paragraph 2.13.
- (b) The issue or the issuer of a money market instrument other than one dealt in on an eligible market, shall be regarded as regulated for the purposes of protecting investors and savings if:
- (i) the instrument is an approved money market instrument;
 - (ii) appropriate information is available for the instrument (including information which allows an appropriate assessment of the credit rates risks related to investments in it) in accordance with paragraph 2.14 below; and
 - (iii) the instrument is freely transferable.

- (bb) an establishment which is subject to and complies with prudential rules considered by the FCA to be at least as stringent as those laid down by UK or EU law.
- (b) An establishment shall be considered to satisfy the requirement in paragraph 2.13(a)(iii) if it is subject to and complies with prudential rules, and fulfils one or more of the following criteria:
 - (i) it is located in the UK or the EEA;
 - (ii) it is located in an OECD country belonging to the Group of Ten;
 - (iii) it has at least one investment grade rating;
 - (iv) on the basis of an in-depth analysis of the issuer, it can be demonstrated that the prudential rules applicable to that issuer are at least as stringent as those laid down by UK or EU law.

- (a) In the case of an approved money market instrument within paragraph 2.13(a)(ii) or issued by a body referred to in the FCA Regulations at COLL 5.2.10EG; or which is issued by an authority within paragraph 2.13(a)(i)(bb) or a public international body within paragraph 2.13(a)(i)(dd), but is not guaranteed by a central authority within paragraph 2.13(a)(i)(aa), the following information must be available:

3. Spread limits

- 3.2 Not more than 10% in value of the Company's investments can consist of transferable securities or money market instruments issued by a single body. This limit of 10% is raised to 25% in value of the Company in respect of covered bonds. In applying the increased limit of 25% certificates representing certain securities are to be treated as equivalent to the underlying security.
- 3.3 The exposure to any one counterparty in an OTC derivative transaction must not exceed 10% in value of the Company's property.
- 3.4 Not more than 20% in value of the Company's investments can consist of transferable securities which are not approved securities and unregulated schemes.
- 3.5 Not more than 35% in value of the Company's property is to consist of the units of any one collective investment scheme.
- 3.6 For the purpose of calculating the limit at paragraph 3.3 above, the rules and conditions set out referred to in COLL 5.6.7R(7) to (11) inclusive apply.
- 3.7 The limits in this Section 3 do not apply in respect of a transferable security or an approved money-market instrument to which COLL 5.6.8R (Spread: government and public securities) applies, for which please see Section 4 below.

If more than 35% in value of the Scheme Property of the Company is invested in such securities issued by any one issuer, no more than 30% in value of the Scheme Property of the Company may consist of such securities of any one issue and the Scheme Property must include at least six different issues whether of that issuer or another issuer.

5. Collective Investment Schemes

- 5.4 Where the second scheme is an umbrella collective investment scheme the above provisions apply to each Sub-fund as if it were a separate scheme.

- 5.5 The Company may invest in units or shares of collective investment schemes and pay any related charges or expenses for investing in such units or shares. Where

the schemes invested in are managed, operated or administered by the ACD (or one of its associates) the rules on double charging contained in the FCA Regulations must be complied with.

5.6 Any second schemes in which the Company invests will be established in the locations listed in Appendix 10. 6.4 Not more than 35% in value of the scheme property of the non-UCITS retail scheme may consist of units of one or more schemes permitted under (6.1) (i) to (iv).

6.5 The non-UCITS retail scheme must not invest directly in units of the relevant master UCITS, qualifying master scheme, property authorised investment fund or recognised scheme.

6.6 The authorised corporate director of the non-UCITS retail scheme must be able to show on reasonable grounds that an investment in one or more schemes permitted under (6.1) (i) to (iv) is:

- (a) in the interests of investors; and
- (b) no less advantageous than if the non-UCITS retail scheme had held units directly in the relevant:
 - (i) master UCITS; or

9. Derivatives: General

- 9.1 Derivatives may be used by the Company for Efficient Portfolio Management purposes only. Derivatives and forward transactions may be used for investment purposes on providing Shareholders with 60 days' notice. As a result, the NAV of the Company could potentially be more volatile, however, it is the Investment Manager's intention that the Company, owing to its portfolio composition or the portfolio management techniques used, will not have volatility over and above the general market volatility of the markets of their underlying investments.

The use of derivatives for Efficient Portfolio Management is not intended to increase the risk profile of the Company. However to the extent that derivatives are used for investment purposes, the overall risk of loss to the Company may be increased. Please also see "Risk Factors" above.

- 9.2 The Company may make use of a variety of derivative instruments in accordance with the FCA Regulations.
- 9.3 A transaction in derivatives or a forward transaction cannot be effected for the Company unless:

- 9.7 If the Company invests in an index-based derivative provided the relevant index falls within the FCA Regulations at COLL 5.6.23R the underlying constituents of the index do not have to be taken into account for the purposes of paragraphs 3 and 4 above, provided the ACD takes account of the requirements for a prudent spread of risk.

10. Permitted Transactions (Derivatives and Forwards)

- 10.1 A transaction in a derivative must:
- 10.1.1 be in an approved derivative; or
- 10.1.2 be an OTC derivative which complies with paragraph 10.4 and:
- (a) the underlying must consist of any or all of the following to which the scheme is dedicated: transferable securities; money-market instruments; permitted deposits; permitted derivatives; permitted collective investment scheme units; certain financial indices; interest rates; foreign exchange rates and currencies;
- (b) the exposure to the underlying must not exceed the limits set out at paragraphs 3 and 4 above.
- 10.2 A transaction in an approved derivative must be effected on or under the rules of an eligible derivatives market. A derivative transaction must not cause the Company to diverge from its investment objectives as stated in the Instrument of Incorporation and the most recently published prospectus and must not be entered into if the intended effect is to create the potential for an uncovered sale of one or more transferable securities, approved money market instruments, collective investment scheme units or derivatives.
- 10.3 Any forward transaction must be with an eligible institution or an approved bank.
- 10.4 OTC transactions in derivatives
- 10.4.1 A transaction in an OTC derivative under paragraph 10.4 must be:

- 10.4.3 on approved terms; the terms of the transaction in derivatives are approved only if the ACD:
- (a) carries out, at least daily, a reliable and verifiable valuation in respect of that transaction corresponding to its fair value and which does not rely only on market quotations by the counterparty; and
 - (b) can enter into one or more further transactions to sell, liquidate or close out that transaction at any time, at its fair value;
- 10.4.4 capable of reliable valuation; a transaction in derivatives is capable of reliable valuation only if the ACD having taken reasonable care determines that, throughout the life of the derivative (if the transaction is entered into), it will be able to value the investment concerned with reasonable accuracy:
- (a) on the basis of an up-to-date market value which the ACD and the Depositary have agreed is reliable; or
 - (b) if the value referred to in (a) is not available, on the basis of a pricing model which the ACD and the Depositary have agreed uses an adequate recognised methodology; and
- 10.4.5 subject to verifiable valuation; a transaction in derivatives is subject to verifiable valuation only if, throughout the life of the derivative (if the transaction is entered into) verification of the valuation is carried out by:
- (a) an appropriate third party which is independent from the counterparty of the derivative, at an adequate frequency and in such a way that the ACD is able to check it; or
 - (b) a department within the ACD which is independent from the department in charge of managing the scheme property and which is adequately equipped for such a purpose.

11. Immovable Property

The Company does not currently intend to have an interest in any immovable or movable property. Investment in immovable property shall only be made on the giving of 60 days' notice to shareholders.

12. General

- 12.1 Underwriting and sub-underwriting contracts and placings may also, subject to certain conditions set out in the FCA Regulations, be entered into for the account of the Company.
- 12.2 Cash or near cash may be retained in the Scheme Property to enable the pursuit of the investment objective; or for redemption of shares in the Company; or efficient management of the Company in accordance with its investment objective or for a purpose which may reasonably be regarded as ancillary to the investment objective of the Company.

13. Stocklending

The Company may not enter into stocklending transactions.

14. Borrowing and lending powers

14.1 The Company may, subject to the FCA Regulations, borrow money from an eligible institution or an Approved Bank for the use of the Company on the terms that the borrowing is to be repayable out of the Scheme Property.

14.2 The ACD must ensure that borrowing does not, on any Business Day, exceed 10% of the value of the Scheme Property.

14.3 These borrowing restrictions do not apply to “back to back” borrowing to be cover for transactions in derivatives and forward transactions.

14.4 The Company will not issue any debenture unless it acknowledges or creates a borrowing that complies with COLL 5.5.4(1) to (6) inclusive.

14.5 The Company will not lend any money which forms part of the Scheme Property.

15. Leverage

15.1 Transactions introducing leverage are generally undertaken to reduce risk or cost in terms of fluctuations in prices, interest rates or exchange rates or involve receiving a premium for the writing of a covered call option or cash covered put option on the property of the Company which the Company is willing to buy or sell at the exercise price. The fund may also borrow up to 10% of its net asset value; as a result of actively invested borrowing the fund would display leveraged characteristics.

The types and sources of leverage and risks the Company may employ are as follows:

i) The Company may borrow up to 10% of its net asset value from an Approved Bank, and

ii) Through the use of derivatives. Any exposure by the Company through the use of derivatives must be covered by cash or readily realisable assets held by the Company. Restrictions on the use of derivatives are outlined in the Investment Objective and Policy in Appendix 1 and detailed in the Investment and Borrowing Powers in Appendix 2.

Please refer to the Risk Factors for details of the risks associated with these types of leverage.

15.2 The following restrictions apply to the use of leverage:

i) Leverage through Borrowing: The Fund may borrow from Eligible Institutions or Approved Banks only.

ii) Leverage through the Use of Derivatives: Derivatives may be used for the purposes of Efficient Portfolio Management only. No current collateral or asset reuse arrangements are currently in place. Should the Fund enter into any contracts that require the use of collateral in future, collateral will be managed

in accordance with FCA Regulations and Guidelines issued from time to time by the European Securities and Markets Authority. A Collateral Management Policy will be implemented by the ACD before the Company enters into any transactions which require it to hold collateral from a counterparty.

- 15.3 Under AIFMD, it is necessary for AIFs to disclose their leverage in accordance with prescribed calculations. The two types of leverage calculations defined are the gross and commitment methods. These methods summarily express leverage as a ratio of the exposure of the AIF against its net asset value. 'Exposure' typically includes debt, the value of any physical properties subject to mortgage, non sterling currency, equity or currency hedging (even those held purely for risk reduction purposes, such as forward foreign exchange contracts held for currency hedging) and derivative exposure (converted into the equivalent underlying positions). The commitment method nets off derivative instruments, while the gross method aggregates them.

The maximum level of leverage for the Company expressed as a ratio of the Company's total exposure to its Net Asset Value:

- (a) under the Gross Method is 200 per cent; and
- (b) under the Commitment Method is 130 per cent.

The limits have been set for the investment policy of the AIF under AIFMD and have been set to accommodate the maximum level of leverage conceivable.
