The Ord Fund ICVC USD

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Accumulation): GB00BPJN0Y82

ISIN (Income): GB00BTHY7Q21

Objectives and Investment Policy

The Company is designed to achieve a combination of capital growth and income, net of fees, over a rolling 5 year period. The Company will invest in a global portfolio which will typically comprise of equities (at least 60%). The remainder of the Scheme Property of the Company may be invested in fixed income assets (which may include government and public securities) and other transferable securities, cash and money market instruments. In addition, the exposure to equities may fall below 60% during difficult markets. Between 80% and 100% of the above exposure will be gained through the use of collective investment vehicles (regulated and unregulated, including those managed by the ACD or its associates or the Investment Manager or its associates), which may include investment trusts, Exchange Traded Funds and Index Funds. The allocation to collective investment vehicles will vary within the range of 80%-100% depending on markets and to take advantage of the expertise available via such collective investment vehicles. All other exposure will be attained from direct investments. Derivatives may be used for the purpose of hedging, although use is expected to be limited. The investment policy of the Company may mean that at times, where it is considered appropriate, the Scheme Property of the Company will not be fully invested and that prudent levels of liquidity will be maintained in order to reduce risk and preserve capital. The Investment Manager will actively manage the Company. This means the Investment Manager actively makes decisions about how to invest the Scheme Property (and which investments to buy and sell) instead of simply following a market index.

The information in this document relates to and is representative of the US dollar class. The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income units, and reinvested in the case of accumulation units. Investors can buy and sell units on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of the Fund price which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.
