

Non-UCITS retail scheme Key Investor Information

tutman.

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

The TM Stockwell Fund

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00BGDQ0J52 ISIN (Income): GB00BGDQ0K67

Objectives and Investment Policy

To achieve capital growth and income.

The Trust aims to achieve its objective by investing in a diversified global portfolio of investments across all economic sectors. The Trust invests primarily in equities and fixed income securities, both directly and through collective investment schemes. The Trust may also invest in money market instruments, deposits and other collective investment schemes (both regulated and unregulated). Derivatives will be used for Efficient Portfolio Management (including hedging) only.

In extraordinary market conditions, it may not be appropriate for the Trust to be invested primarily in equities and fixed income securities and the Trust may temporarily invest up to 100% of its total assets in money market instruments, deposits and units in collective investment schemes. Examples of extraordinary market conditions include periods of heightened volatility caused by a sudden economic downturn or events such as political unrest, war or bankruptcy of large financial institutions.

The Trust uses the Investment Association Flexible Investment peer group for performance comparison purposes.

The peer group has been selected as a comparator for performance because the constituents are representative of the areas in which the Trust itself is likely to invest, and it is therefore an appropriate comparator for the Trust's performance.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income units, and reinvested in the case of accumulation units. Investors can buy and sell units on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of simulated data which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.32%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 31st March 2022. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Charges and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

Performance source: Morningstar Direct

- The Fund launched in 2018
- The bar chart shows the calendar year returns for the last 2 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance
- Past performance has been calculated in pounds sterling
- Performance will be calculated as Total Return, including all charges levied against the Fund
- Past performance has limited value as a guide to future performance
- Investments may go down as well as up
