## The Torridon Growth Fund

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Accumulation):

### Objectives and Investment Policy

The investment objective of the Company is to provide capital growth, net of fees, over a rolling 5 year period.

The Company will invest in a global portfolio, which will typically comprise of at least 60% equities. The Company may invest in some or all sectors and in some or all world markets in order to take advantage of economic opportunities worldwide.

The Company may also invest in fixed income assets (which may include government and public securities) and other transferable securities, money market instruments, cash, near cash and deposits. The composition of the Scheme Property as between equities, fixed income and other assets, will vary over time in response to the Investment Managers' assessment of market conditions as well as the economic environment. The exposure to equities may fall below 60% during difficult markets. The above exposure may be gained directly or through the use of collective investment vehicles, including investment trusts and exchange traded vehicles (including collective investment vehicles managed by the ACD or its associates or the Investment Managers or their associates).

Typically, regulated collective investment vehicles will be used but unregulated collective investment vehicles may also be used in accordance with the FCA Rules. In addition, the Company may invest in eligible alternatives (e.g. gold, commodities, renewable energy and real estate) indirectly via permitted instruments such as collective investment vehicles. Derivatives may be used for the purpose of Efficient Portfolio Management (including hedging), although use is expected to be limited. The ACD has appointed multiple Investment Managers with different investment styles to achieve the investment objective.

Allocations to the Investment Managers are subject to change in order to meet the Company's investment objective and further details regarding the allocations are available upon request from the ACD. The Investment Managers will actively manage the Company. This means the Investment Managers actively make decisions about how to invest the Scheme Property (and which investments to buy and sell) instead of simply following a market index.

The Company uses the Investment Association Mixed Investment 40-85% Shares peer group for performance comparison purposes. This peer group is not a target and the Company is not constrained by it. The peer group has been selected as a comparator for performance because the parameters for this peer group of between 40% and 85% exposure to equities are closely aligned with the policy of the Company.

The ACD reserves the right to change the peer group following consultation with the Depositary and in accordance with the rules of COLL. A change could arise, for example, where the ACD determines that an alternative may be more appropriate. Shareholders will be notified of such a change through an update to the Prospectus and the change noted in the subsequent annual and half yearly reports.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

### Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of simulated data which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund. All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.
